#### ***Preamble***

*This document is a draft for industry and professional comment. As such, it represents the preliminary, though considered, views of the Australian Taxation Office. This draft may not be relied on by taxation officers, taxpayers and practitioners. When officially released as a final ruling it will be a public ruling for the purposes of section 37 of the **Taxation Administration Act 1953** and may be relied upon by any person to whom it applies.*

### **What this Ruling is about**

---

1. This Ruling explains how the *A New Tax System (Goods and Services Tax) Act 1999* ('GST Act') applies if part or all of the consideration for a supply is not expressed as an amount of money (that is, if it is non-monetary consideration). This includes transactions commonly referred to as barter, part exchange and 'in-kind' payments.
2. In this Ruling, any consideration expressed as an amount of money is referred to as monetary consideration. The Ruling explains the meaning of monetary consideration for the purposes of subsection 9-75(1) and provides principles for identifying non-monetary consideration for a supply.
3. Something that is non-monetary consideration can itself be a taxable supply. The Ruling describes when this can happen and gives guidelines for identifying what the consideration is for such a supply.
4. The Ruling describes what are reasonable methods of ascertaining the GST inclusive market value of that non-monetary consideration and provides guidance when this valuation should be done.
5. The Ruling gives guidelines on when GST payable and input tax credits are attributable where a transaction involves non-monetary consideration.
6. You may also apply the guidelines in this Ruling to work out the value of a taxable supply under subsections 9-75(2) and 9-75(3), and under provisions that have effect despite section 9-75. (See paragraphs 24 and 25 of this Ruling.)

# GSTR 2001/D5

7. The Ruling does not cover trade exchange transactions. Trade exchange transactions generally involve a number of entities that have agreed in writing to accept credits on their membership accounts in exchange for goods, services or anything else.

8. All legislative references in this Ruling are to the GST Act, unless otherwise stated.

## Date of effect

---

9. This Ruling, when finalised, applies on and from 1 July 2000.

## Background

---

10. One of the necessary elements of a taxable supply is that you make the supply for consideration.<sup>1</sup> Also, you need to identify the consideration provided for a supply, for the purposes of:

- determining whether or not the consideration for the supply is expressed as an amount of money under paragraph 9-75(1)(a); and
- identifying anything for which a GST inclusive market value needs to be worked out under paragraph 9-75(1)(b); and
- identifying when the consideration is received and provided for attribution purposes under sections 29-5 and 29-10.

11. Under section 195-1, consideration for a supply or acquisition means any consideration in connection with the supply or acquisition. Subsection 9-15(1) provides that consideration includes:

- ‘(a) any payment, or any act or forbearance, in connection with a supply of anything; and
- (b) any payment, or any act or forbearance, in response to or for the inducement of a supply of anything.’

Also, under subsection 9-15(2), it does not matter whether the payment, act or forbearance was voluntary, or whether it was by the recipient of the supply.

---

<sup>1</sup> Paragraph 9-5(a).

12. ‘Payment’ is not restricted to payments of money. It includes ‘in kind’ payments, that is, payments made otherwise than in money.<sup>2</sup> An example of a payment is the provision of shares. An example of an act is the provision of services. An example of a forbearance is the refraining from selling a particular product. These acts or forbearances are ‘in kind’ payments. Throughout this Ruling, unless otherwise stated, a reference to a payment includes a reference to an act or forbearance.

13. The amount of GST on a taxable supply is 10% of the value of the taxable supply.<sup>3</sup> Under subsection 9-75(1), the value of a taxable supply is the price x 10/11, where the price is the sum of:

- ‘(a) so far as the consideration for the supply is consideration expressed as an amount of money - the amount (without any discount for the amount of GST (if any) payable on the supply); and
- (b) so far as the consideration is not consideration expressed as an amount of money - the GST inclusive market value of that consideration.’

14. If you receive any non-monetary consideration for a supply, the price includes the GST inclusive market value of that consideration. Where there is monetary consideration for a supply, it does not necessarily follow that there is no other consideration for that supply.

15. In some transactions, particularly those involving monetary consideration only, the consideration is readily apparent. However, many transactions involve parties entering into multiple obligations. The question arises as to whether those obligations are consideration (or additional consideration) for a taxable supply.

16. By providing non-monetary consideration for a supply, you are also making a supply. Where this happens, you need to be able to determine whether the elements of a taxable supply under paragraphs 9-5(a) to (d) are satisfied. If the non-monetary consideration you provide is a taxable supply, you will have to determine the GST inclusive market value of the consideration you receive for your supply.

---

<sup>2</sup> “The word ‘payment’ in itself is one which ... may cover many ways of discharging obligations. It may even ... include a discharge, not by money payment at all, but by what is called ‘payment in kind’” (per Lord Evershed in *White v. Elmdene Estates* [1959] 2 All ER 605).

<sup>3</sup> Section 9-70.

## Ruling and explanations

### Value of a taxable supply

17. The amount of GST on a taxable supply is calculated according to its value.<sup>4</sup> Where the value of a taxable supply is determined by subsection 9-75(1), the value is based on the price. Subsection 9-75(1) requires that ‘so far as the consideration’ is monetary, then the amount of GST is included in the price; and so far as the consideration is non-monetary, then the GST inclusive market value is included in the price. The price is the sum of these amounts and is not based on the market value of the supply.<sup>5</sup>

18. The amount of GST on a taxable supply is 10% of its value. The value is 10/11 of the price that is the sum of the amount of any monetary consideration plus the GST inclusive market value of the non-monetary consideration.

|                                       |   |                                      |   |   |
|---------------------------------------|---|--------------------------------------|---|---|
| Amount of<br>GST on<br>taxable supply | = | 10%                                  | x | Value   |
| Value                                 | = | 10/11                                | x | Price   |
| Price                                 | = | [amount of monetary<br>consideration | + | GST inclusive market<br>value of non-monetary<br>consideration] |

### *Example 1<sup>6</sup> - wholly non-monetary consideration*

19. *Jasper sells a computer to Kasper in return for 10 office chairs. The GST inclusive market value of the computer and the chairs is the same for each, being \$5,500.*

<sup>4</sup> Section 9-70.

<sup>5</sup> However, in some limited instances, determining the GST inclusive market value of the supply may be an acceptable method for working out the GST inclusive market value of the consideration. Refer to paragraphs 134 to 153 of this Ruling for a discussion of this issue.

<sup>6</sup> In the examples in this Ruling (unless otherwise stated and apart from paragraph 9-5(a) which requires that you make the supply for consideration), the elements of a taxable supply in section 9-5 are satisfied, and the supply is not GST-free or input taxed.

20. *Jasper has supplied the computer for consideration (that is, for the chairs) and, as the supply is not otherwise GST-free or input taxed, he has made a taxable supply. As the consideration is non-monetary, under subsection 9-75(1) the price for the supply of the computer is the GST inclusive market value of the chairs, that is, \$5,500. Using the above table, the GST payable by Jasper:*

$$\begin{aligned}
 &= 10\% \times \text{value} \\
 &= 10\% \times 10/11 \times \text{price} \\
 &= 10\% \times 10/11 \times [\text{amount of monetary consideration} + \text{GST inclusive market value of the chairs}] \\
 &= 10\% \times 10/11 \times [\$0 + \$5,500] \\
 &= 10\% \times 10/11 \times \$5,500 \\
 &= \$500.
 \end{aligned}$$

21. *Kasper makes a taxable supply of the chairs to Jasper who provides the computer as consideration. The GST payable by Kasper:*

$$\begin{aligned}
 &= 10\% \times \text{value} \\
 &= 10\% \times 10/11 \times \text{price} \\
 &= 10\% \times 10/11 \times [\text{amount of monetary consideration} + \text{GST inclusive market value of the computer}] \\
 &= 10\% \times 10/11 \times [\$0 + \$5,500] \\
 &= 10\% \times 10/11 \times \$5,500 \\
 &= \$500.
 \end{aligned}$$

*Example 2 - partly non-monetary consideration*

22. *Steve's Faxes Pty Ltd supplies a fax machine to Lil's Cycle Shop in return for a bicycle and \$110. The bicycle has a GST inclusive market value of \$550. The fax machine has a GST inclusive market value of \$660.*

23. *Using the above table, the GST on the supply of the fax machine by Steve:*

$$\begin{aligned}
 &= 10\% \times \text{value} \\
 &= 10\% \times 10/11 \times \text{price} \\
 &= 10\% \times 10/11 \times [\text{amount of monetary consideration} + \text{GST inclusive market value of the bicycle}]
 \end{aligned}$$

# GSTR 2001/D5

$$\begin{aligned} &= 10\% \times 10/11 \times [\$110 + \$550] \\ &= 10\% \times 10/11 \times \$660 \\ &= \$60.^7 \end{aligned}$$

### *Other sections dealing with the value of a taxable supply*

24. 'Price' in relation to a taxable supply has the meaning given by section 9-75, and the 'value' of a taxable supply has the meaning given by sections 9-75, 9-80 and a number of other sections.<sup>8</sup> Those other sections have effect despite section 9-75. For example, section 72-10 has effect despite section 9-75 when you make a supply to your associate without consideration.

25. This Ruling deals with non-monetary consideration primarily in the context of subsection 9-75(1). However, so far as they are relevant, the guidelines in this Ruling apply to working out the value of a taxable supply under subsections 9-75(2) (luxury car tax value) and 9-75(3) (value of a fringe benefit), and under the provisions that have effect despite section 9-75.

### **What is 'consideration expressed as an amount of money'?**

26. You need to establish whether the consideration provided in connection with, in response to or for the inducement of the taxable supply is monetary or non-monetary to decide whether paragraph 9-75(1)(a) or 9-75(1)(b) applies to it. Where parties are dealing at arm's length and the consideration is wholly monetary (that is, 'expressed as an amount of money'), you do not need to establish the market value of the consideration to work out the price.<sup>9</sup> If the consideration is wholly (or partly) non-monetary, you need to establish the GST inclusive market value of the non-monetary portion of the consideration (and add it to the monetary amount) to work out the price.

27. For the purposes of subsection 9-75(1), we are of the view that 'consideration expressed as an amount of money' is consideration that finds expression in money or 'sounds in money'.<sup>10</sup> The distinction

---

<sup>7</sup> The GST consequences of Lil's supply is discussed at paragraphs 128 to 130 of this Ruling.

<sup>8</sup> See section 195-1, paragraph (b) of the definition of 'value'.

<sup>9</sup> You need to establish the GST exclusive market value of the supply under subsection 72-70(1) for supplies to associates for inadequate consideration.

<sup>10</sup> In *Burrill v. Federal Commissioner of Taxation* (1996) 33 ATR 133; 96 ATC 4629 that dealt with subsection 21(1) of the *Income Tax Assessment Act 1936*, the Full Federal Court held that a promise to pay money in the form of bonds issued by a government entity where the face value is to be paid over a number of years is not consideration 'in kind', and although it is not actually money, it 'sounds in money'.

between paragraphs 9-75(1)(a) and 9-75(1)(b) is essentially between monetary consideration and what can be broadly described as ‘in kind’ consideration.

28. Section 195-1 provides that ‘money’ includes:

- ‘(a) currency (whether of Australia or of any other country); and
- (b) promissory notes and bills of exchange; and
- (c) any negotiable instrument used or circulated, or intended for use or circulation, as currency (whether of Australia or of any other country); and
- (d) postal notes and money orders; and
- (e) whatever is supplied as payment by way of:
  - (i) credit card or debit card; or
  - (ii) crediting or debiting an account; or
  - (iii) creation or transfer of a debt.

However, it does not include:

- (f) a collector’s piece; or
- (g) an investment article; or
- (h) an item of numismatic interest; or
- (i) currency the market value of which exceeds its stated value as legal tender in the country of issue.’

29. We consider that a promise to pay an amount of money is consideration expressed as an amount of money.<sup>11</sup> For example, if two parties set-off (in full or in part) mutual debts that were created as a result of mutual supplies for monetary consideration, the consideration for each supply is expressed as an amount of money.

*Example 3 - monetary consideration*

30. *Alice supplies goods to Bob in return for \$1,000. Bob has not yet paid the money to Alice. The parties decide that, as Alice already owes Bob \$1,000, Bob does not need to make any payment. The consideration for Alice’s supply is expressed as an amount of money, that is, \$1,000.*

31. This is in contrast to an arrangement where a supplier agrees to accept non-monetary consideration in substitution for a monetary

---

<sup>11</sup> Section 195-1 defines ‘amount’. An amount of money includes a nil amount of money.

payment. In this case, the parties have agreed to change what is the consideration for the supply.

*Example 4 - substituting non-monetary consideration*

32. Arthur supplies goods to Bella in return for \$1,000. Bella has not yet paid the money to Arthur. Arthur and Bella then agree to substitute goods for the \$1,000 that Bella owes Arthur. The consideration for Arthur's supply is the goods provided by Bella and it is, therefore, not expressed as an amount of money.<sup>12</sup> As the goods that Bella gives to Arthur are also a supply, she issues Arthur with a tax invoice.

*Amount of money's worth*

33. Merely ascribing a monetary amount or value to a thing will not cause it to be 'expressed as an amount of money'. For example, if the parties to an arm's length transaction agree that a widget worth \$1,000 is to be provided as consideration for a taxable supply, the \$1,000 widget is not 'consideration expressed as an amount of money'.

34. Also, consideration that is calculated by reference to an amount of money's worth is not 'consideration expressed as an amount of money'. For example, \$1,000 worth of widgets is not 'consideration expressed as an amount of money'.

35. However, in both of the above cases, although the goods are not monetary consideration, the \$1,000 is the price for the supply under paragraph 9-75(1)(b), provided the \$1,000 is the GST inclusive market value of the goods.

36. This interpretation is consistent with the application of subsection 9-75(1), that is, to calculate the price and amount of GST on a taxable supply based on the GST inclusive market value of consideration broadly described as 'in kind' consideration. Nominating another amount, instead of the GST inclusive market value, would be contrary to the application of this subsection.

*Money to be paid in the future*

37. Where the consideration is money to be paid at a future time, rather than describing it for GST purposes as a right to receive that money, it is consideration expressed as an amount of money under

---

<sup>12</sup> As the consideration has changed from monetary to non-monetary, an adjustment event has occurred. However, no adjustment is necessary where the value of the consideration has not changed. Refer to paragraphs 201 to 206 of this Ruling.

subsection 9-75(1). For example, A agrees to supply goods to B in return for \$10,000 to be paid 12 months after the date when the goods are delivered. The consideration is \$10,000 and is expressed as an amount of money. The consideration is not the net present value of the \$10,000.

*Unascertainable final amount*

38. The Commissioner has issued a determination under paragraph 29-25(2)(e) to be applied in certain circumstances where the total consideration is unknown in the tax period when GST would normally be payable.<sup>13</sup> This determination alters the attribution rules by allowing an entity to account for the GST payable in different tax periods depending upon when the amount of consideration is known. The words ‘an amount of money’ do not require that a final amount of money is known as at any particular time, such as when the agreement is made. The following is an example of consideration expressed as an amount of money:

*Example 5 - final amount of consideration is unknown and the determination applies*

39. *Quentin supplies a business to Xanthe who agrees to pay a lump sum of \$100,000 on completion of the transfer and 10% of the gross sales of the business over \$150,000 each year, for the next 2 years.*<sup>14</sup>

40. *When the lump sum of \$100,000 is received by Quentin, the final amount of consideration is not known. However, the consideration is expressed as an amount of money for the purposes of subsection 9-75(1). In the circumstances, the determination under paragraph 29-25(2)(e) applies. Therefore, GST is attributable on the \$100,000 in the tax period in which it is received.*<sup>15</sup> Also, GST is

---

<sup>13</sup> For the determination under paragraph 29-25(2)(e), see Schedule 5 of Goods and Services Tax Ruling GSTR 2000/29 (Goods and services tax: attributing GST payable, input tax credits and adjustments and particular attribution rules made under section 29-25).

<sup>14</sup> For the purposes of this example, it is assumed that Subdivision 38-J does not apply to make the supply of the business GST-free. For example, they have not agreed in writing that the supply is of a going concern, under paragraph 38-325(1)(c).

<sup>15</sup> The basic rules for attribution in relation to the balance of the consideration is explained in Schedule 5 of Goods and Services Tax Ruling GSTR 2000/29 (Goods and services tax: attributing GST payable, input tax credits and adjustments and particular attribution rules made under section 29-25).

# GSTR 2001/D5

*attributable on the remaining amounts of consideration when those amounts are known.*<sup>16</sup>

## ***Non-monetary consideration and transitional agreements with no opportunity to review***

41. An agreement may identify a way of working out the consideration in money, as is the case for agreements to which section 13 of the *A New Tax System (Goods and Services Tax Transition) Act 1999* applies.<sup>17</sup> For example, paragraph 44 of Goods and Services Tax Ruling GSTR 2000/16 (Goods and services tax: transitional arrangements - GST-free supplies under existing agreements) ('GSTR 2000/16') states that the identification of the consideration as \$1,000 worth of widgets is identification of a way of working out the consideration in money.<sup>18</sup>

42. Although this way of working out the consideration for the purposes of section 13 calculates in money what the consideration is worth, the consideration is not expressed as an amount of money for the purposes of subsection 9-75(1). However, the way of working out the consideration may allow you to calculate subsequently the GST inclusive market value of the consideration under subsection 9-75(1). That is, when the wording of section 13 is compared to the circumstances when consideration is expressed as an amount of money for the purposes of subsection 9-75(1), it is apparent the two provisions have separate and distinct applications.

### *Example 6 - consideration not 'expressed as an amount of money'*

43. *Angus agrees to make a supply to Barry. The consideration to be provided by Barry is particular goods. The agreement between the parties states that the goods are worth \$100. Although the agreement has identified a way of working out the consideration in money for the purposes of section 13, the consideration is not 'expressed as an amount of money'.<sup>19</sup> For the purposes of subsection 9-75(1), the price*

---

<sup>16</sup> It is not necessary to undertake a net present value calculation for the balance of the consideration.

<sup>17</sup> Depending upon the timing of making a supply and the provision of consideration under an agreement spanning 1 July 2000, section 13 may apply to make supplies GST-free if '(a) a written agreement specifically identifies a supply and identifies the consideration in money, or a way of working out the consideration in money, for the supply; and (b) the agreement was made before the day on which this Act received the Royal Assent.'

<sup>18</sup> See paragraphs 33 to 36 of this Ruling and paragraphs 41 to 56 of Goods and Services Tax Ruling GSTR 2000/16 (Goods and services tax: transitional arrangements - GST-free supplies under existing agreements) for a discussion of the requirements.

<sup>19</sup> See paragraphs 33 to 36 of this Ruling.

*for the supply by Angus is the GST inclusive market value of the specified goods.*

### **Identifying non-monetary consideration**

44. The definition of a taxable supply requires, among other things, that you make a supply for consideration.<sup>20</sup> There needs to be a supply, consideration and the necessary relationship between the supply and the consideration. Where one party makes monetary payments to another, it is generally clear that something of economic benefit is being provided. The question is whether there is a sufficient nexus between the supply and the payment as consideration.

45. The same analysis applies in determining whether a good, service or thing is non-monetary consideration for a supply. However, due to the breadth of the definition of consideration (and the numerous promises that each party to a transaction usually makes), establishing what is the consideration for a supply is not always as simple as for monetary transactions. Nor is it always as clear if something of economic value is being provided.

### ***What is ‘consideration’?***

46. A supply is a taxable supply, if among other things, the supply is made for consideration.<sup>21</sup> Consideration is defined in section 9-15 to mean ‘any consideration, within the meaning given by section 9-15, in connection with the supply’. The meaning given to consideration in section 9-15 extends beyond payments to include such things as acts and forbearances.<sup>22</sup> It may include payments made voluntarily, and payments made by persons other than the recipient of a supply.<sup>23</sup>

47. Section 9-15 further provides that a payment will be consideration for a supply if the payment is ‘in connection with’ a supply and ‘in response to’ or ‘for the inducement’ of a supply. Thus, there must be a sufficient nexus between a particular supply and a particular payment, that is provided for that supply, for there to be a supply for consideration.

48. It follows that there are two elements to the definition of consideration. The first is the payment by one entity to another. The second element is the nexus that must be established between the payment and a supply.

---

<sup>20</sup> Paragraph 9-5(a).

<sup>21</sup> Paragraph 9-5(a).

<sup>22</sup> Subsection 9-15(1). Also, as noted at paragraph 12 of this Ruling, a reference to a ‘payment’ in this Ruling includes a reference to an act or forbearance.

<sup>23</sup> Subsection 9-15(2).

# GSTR 2001/D5

49. The definition of consideration in the New Zealand GST Act is similar to the Australian definition.<sup>24</sup> In *C of IR v. Databank Systems Ltd* (1989) 11 NZTC 6093, at 6102, Richardson J commented that the New Zealand definition of consideration ‘breathed comprehensiveness’.

50. In *New Zealand Refining Co. Ltd v. C of IR* (1995) 17 NZTC 12307, at 12314, Henry J commented that the definition was wide, and that ‘in response to’ and ‘for the inducement of’ added little to ‘in respect of’, given the breadth of the latter term.

51. In Australia, the definition of consideration is similarly wide. To the extent that ‘in connection with’ may be narrower in scope than ‘in respect of’, the phrases ‘in response to’ and ‘for the inducement of’ may assume added stature.

## ***Is the supply made for consideration?***

52. The general theme of a ‘supply for consideration’ is as much a cornerstone of the value added tax (‘VAT’) and GST regimes in the United Kingdom (‘UK’), New Zealand and Canada as it is under the GST Act.

### *The need for nexus*

53. It will not be sufficient for there to be a supply and a payment. GST is not payable on supplies unless they are made for consideration, and the other tests in section 9-5 are satisfied.<sup>25</sup> There must be a sufficient nexus between the supply and the payment. In *C of IR v. New Zealand Refining Co. Ltd* (1997) 18 NZTC 13187, at 13193 Blanchard J commented:

‘It can be seen that ... a linkage between supply and consideration is requisite to the imposition of the tax ... There is a practical necessity for a sufficient connection between the payment and the supply. The mechanics of the legislation will otherwise make it impossible to collect the GST.’

---

<sup>24</sup> Subsection 2(1) of the *Goods and Services Tax Act 1985* (New Zealand) - Definitions: - ‘Consideration’, in relation to the supply of goods and services to any person, includes any payment made or any act or forbearance, whether or not voluntary, in respect of, in response to, or for the inducement of, the supply of any goods and services, whether by that person or by any other person; but does not include any payment made by any person as an unconditional gift to any non-profit body.

<sup>25</sup> Paragraph 9-5(a).

***The nexus test in Canada and the European Community***

54. The Canadian legislation uses the expression ‘consideration for the supply’.<sup>26</sup> The VAT law in the European Community uses the expression ‘supply effected for consideration’, with no elaboration on what ‘for’ means in this context.<sup>27</sup> The Courts in the UK have adopted a ‘direct link’ test in determining whether consideration is ‘for’ a supply in those jurisdictions.<sup>28</sup>

***The nexus test in New Zealand***

55. While European and Canadian authorities demonstrate the need for a link between supply and consideration for a VAT or GST liability to arise, in New Zealand the definition of consideration itself describes the link. The term ‘consideration’ is defined in relation to supplies of goods and services. The definition includes any payment in respect of, in response to, or for the inducement of, the supply of any goods and services.<sup>29</sup>

56. In the High Court of New Zealand decision of *New Zealand Refining*, Henry J commented in relation to the application of European Authorities to New Zealand’s GST Act:

‘I do not think there is any principle of construction relevant to the present issue to be discerned from a review of the authorities cited in argument. It can be said they demonstrate the need for a link or nexus between a payment and the identified service, but I doubt whether there is any call to go beyond an application of the statutory words defining the term “consideration” in reaching a decision in any particular case.’<sup>30</sup>

57. In the Court of Appeal decision of *New Zealand Refining*, Blanchard J noted the absence of a binding commitment to make particular supplies, and stated that a ‘sufficient connection’ between the payment and a supply was necessary. The Court concluded that the payments that were made conditional on the refinery remaining operational were not consideration for any supply, as there was no binding commitment to make particular supplies.

---

<sup>26</sup> In Canada, tax is payable on ‘the value of the consideration for the supply’ [*Excise Tax Act, R.S., c.E-13* subsection 165(1)].

<sup>27</sup> The Sixth VAT Directive of the European Council (‘Sixth Directive’) [EC Council Directive 77/388 of 17 May 1977 on the harmonisation of the laws of the member states relating to turnover taxes – Common system of value added tax: uniform basis of assessment].

<sup>28</sup> See, for example, *Apple and Pear Development Council v. Customs and Excise Commissioners* [1988] BTC 5116.

<sup>29</sup> *Goods and Services Tax Act 1985* (New Zealand), subsection 2(1).

<sup>30</sup> (1995) 17 NZTC 12307 at 12314.

# GSTR 2001/D5

58. The only recourse the government had was to cease making payments once the condition failed to be met. The payments were directed to maintaining the structural framework within which supplies of services were expected to be made. The purpose that the refinery remain operational was distinct from any supply of services to be made. Thus, on the particular facts of this case the requisite link between a supply of particular services and consideration was not established.<sup>31</sup>

59. The nexus requirement was further emphasised in the *Chatham Islands Enterprise Trust v. Commissioner of Inland Revenue* (1999) 19 NZTC 15075 decision of the New Zealand Court of Appeal. There, the Court considered whether an amount settled on a trust by the New Zealand Government could be construed as consideration for a supply of services made by the trustee to either the settlor or the beneficiaries.

60. Tipping J, in supporting the view that there must be a ‘sufficient’ nexus, commented:

‘I therefore have difficulty in seeing how it can be said that the payments made by the Crown were in respect of, or for the inducement of, any services. Clearly the payments were not in response to the supply of services.’

## *The nexus test in Australia*

61. A supply is not subject to GST in Australia unless it is made for consideration.<sup>32</sup> Consideration ‘for a supply or acquisition’ is defined in section 195-1 as any consideration, within the meaning given by section 9-15, that is ‘in connection with the supply or acquisition’.

62. We consider that, in the context of the GST Act, the expression ‘you make the supply for consideration’ in paragraph 9-5(a) means the same as ‘there is consideration for the supply that you make’.<sup>33</sup>

63. The references in the GST Act to ‘supply for consideration’<sup>34</sup> and more commonly to ‘consideration for a supply’<sup>35</sup> underscore the

---

<sup>31</sup> *C of IR v. New Zealand Refining Co. Ltd* (1997) 18 NZTC 13187 at 13193 - 13194 per Blanchard J.

<sup>32</sup> Paragraph 9-5(a).

<sup>33</sup> Compare paragraph 11-5(c) – one of the requirements of a creditable acquisition is that you provide consideration for the supply. In addition, the definition of ‘supply’ itself adopts the expression ‘consideration for a supply’.

<sup>34</sup> For example paragraph 9-5(a).

<sup>35</sup> The term ‘consideration for a supply’ appears in, for example, paragraph (a) of the definition of ‘price’ in subsection 9-75(1), in subsection 9-85(2) in relation to the value of a supply, and in paragraph 11-5(c) in defining a creditable acquisition.

close coupling between the supply and the consideration that is necessary before a payment will be consideration for a supply that will make the supply subject to GST.<sup>36</sup>

64. In a similar fashion to the GST legislation in New Zealand, the nature of the nexus required between supply and consideration is specified in the definition of consideration.<sup>37</sup> A payment will be consideration for a supply if the payment is ‘in connection with’, ‘in response to’ or ‘for the inducement’ of a supply.<sup>38</sup>

65. In determining whether a payment satisfies the requirements of subsection 9-15(1), the test is whether there is a sufficient nexus between the supply and the payment made.

66. This test may establish a nexus between consideration and supply in a broader range of cases than the ‘direct link’ test that applies in the European Community and in Canada. While caution needs to be exercised in applying decisions on connective terms in other contexts, the term ‘in connection with’ has been held to be broader in scope than ‘for’.

67. The meaning given to the term ‘in connection with’ in *Berry v. FC of T* (1953) 89 CLR 653<sup>39</sup> is similar to that which was described by the Court of Appeal in *New Zealand Refining*,<sup>40</sup> but needs to be applied with regard to the structure of the definition of supply in the GST Act. In *Berry’s Case*, Kitto J held that ‘in connection with’ was a broader test than ‘for’. At page 659, he commented that consideration will be in connection with property where:

‘the receipt of the payment has a substantial relation, in a practical business sense, to that property’.

68. In determining whether a sufficient nexus exists between supply and consideration, regard needs to be had to the true character of the transaction. An arrangement between parties will be characterised not merely by the description that parties give to the arrangement, but by looking at all of the transactions entered into and the circumstances in which the transactions are made.<sup>41</sup>

---

<sup>36</sup> Subject to the other requirements of the GST Act, particularly the requirements in section 9-5.

<sup>37</sup> *Goods and Services Tax Act 1985* (New Zealand).

<sup>38</sup> Subsection 9-15(1).

<sup>39</sup> In the High Court decision in *Berry v. FC of T* (1953) 89 CLR 653, Kitto J considered the meaning of consideration ‘for or in connection with’ in the context of former section 84 of the *Income Tax Assessment Act 1936*, a provision which included consideration for or in connection with goodwill in a lease premium.

<sup>40</sup> (1997) 18 NZTC 13187 at 13193-13194 per Blanchard J.

<sup>41</sup> *Marac Finance Ltd v. Virtue* (1981) 1 NZLR 586.

***Form of non-monetary consideration***

69. The following two cases illustrate the form that non-monetary consideration can take, and the need to find the necessary link in overseas jurisdictions between the supply and the payment.

70. An example of non-monetary consideration was dealt with by the Court of Justice of the European Communities in *Naturally Yours Cosmetics Ltd v. Customs and Excise Commissioners* (1988) 3 BVC 428. This case involved a cosmetics company that sold its products through beauty consultants who arranged for hostesses to organise parties at which the products were offered for sale. The beauty consultant purchased the pot of cream from the cosmetics company for an amount of money less than its normal selling price, giving an undertaking to use it only for the purpose of providing it as a gift to a hostess for organising a party. Otherwise, the beauty consultant had to pay the normal price or return it.

71. It was found there was a direct link between the supply of the pot of cream and the service provided by the beauty consultant to the cosmetics company of arranging the party. The service was therefore non-monetary consideration for the supply of the pot of cream. The consultant's service was valued as the difference between the cream's normal wholesale price and the money paid by the consultant.

72. Similarly, in the UK case of *Rosgill Group Ltd v. Customs and Excise Commissioners* [1997] BVC 388, a company sold goods on a 'party plan' system. It rewarded hostesses for holding parties for the promotion of its goods by commission based on the value of goods sold at the party. The amount of commission depended on whether it was taken in money or as a discount on the price of goods. A hostess chose to receive her commission as a discount on the purchase of a blouse.

73. The Court of Appeal considered that under article 11(A)(1)(a) of the Sixth Directive the taxable amount was made up of 'everything' obtained by the supplier from the hostess. The hostess did not simply pay the money. She also held the party at her house. In holding the party, she was rendering a service of value to Rosgill so there was a 'direct link' between the provision by the hostess of that service to Rosgill and the supply of the blouse.

74. The Court of Appeal said there was also a causative link as the purchase would not have happened if the service had not been provided, and a contractual link as the purchase of the blouse at the reduced price was in exercise of a contractual right acquired under the agreement to hold the party. The consideration given by the hostess for her blouse therefore consisted partly of monetary consideration and partly of non-monetary consideration, being her service of holding the party at her house.

***Economic value and independent identity***

75. For a payment to be consideration for a supply, it must have economic value or benefit provided as compensation for the making of the supply. That is, the payment is something of value that an acquirer would usually or commercially pay money to acquire. The consideration is capable of being valued as an amount of money even if the GST inclusive market value is ‘nil’.<sup>42</sup>

76. This will usually be demonstrated where parties to an arrangement assign a specific or separate value to a payment. However, the assigning of a value is not necessary for a payment to form non-monetary consideration. Whether a payment is consideration for a supply depends on the true character of the transaction.

77. Consideration for a supply is something the supplier receives for making the supply. Although a non-monetary payment (and acts or forbearances) can form consideration, the character of the transaction will determine whether it forms part of the consideration received by the supplier for making the supply.

78. Many transactions involve exchanging various rights and obligations between the parties to the transaction. In particular, the true character of the transaction may characterise the payment as a condition of the contract; rather than the provision of non-monetary consideration. For example, in many cases, agreeing to enter into a contract to receive a supply for a specific period of time is not non-monetary consideration for that supply.

79. Also, subject to the terms of the agreement, transactions will often involve a supply made only for monetary consideration. In these circumstances, obligations entered into as part of the transaction by the entity that is liable to provide the money will not be separate parts of the consideration for the supply. Similarly, where the transaction in substance involves a supply made for a thing that is non-monetary consideration, the obligations to provide that thing will not constitute separate parts of the consideration.

80. Non-monetary consideration needs to have a clearly independent identity. Obligations that are essentially another way of describing the consideration do not have a separate existence. For example, the obligation to pay money does not exist separately from the payment of money for the purposes of identifying the consideration. Also, in most cases, the use of a particular method of payment is not consideration. For example, where a supply is made

---

<sup>42</sup> Section 195-1 states ‘amount’ includes a nil amount.

# GSTR 2001/D5

for a lower price if a customer uses a credit card, then the use of the credit card is not non-monetary consideration.

## *Obligations, acts or forbearances that define a supply*

81. Particular terms under which a transaction is conducted need to go beyond merely defining or describing the supply, or specifying rights that are to be retained by the entity making the supply, before there is a separate supply or separate consideration. This principle also applies in overseas jurisdictions.

82. Chisholm J in the New Zealand case of *The Trustee, Executors and Agency Co New Zealand Ltd v. Commissioner of Inland Revenue* (1997) 18 NZTC 13,076, held that the cost of meeting liabilities that are properly regarded as those of the landlord (for example, rates where the primary rating liability is on the landlord) forms part of the value of the supply.

83. In the UK case of *Ridgeons Bulk Ltd v. Customs and Excise Commissioners* [1994] BVC 77, a landlord granted a lease of a sawmill in consideration of the lessee agreeing to perform building work and to pay rent after a three-year rent-free period. The tenant contended that what was moving from the landlord to the tenant was a supply of land and the consideration for that supply of land was a bundle of covenants (including the payment of rent), and that it was not proper to dissect the lease.

84. Popplewell J, in the Queen's Bench Division, found that the evidence indicated that what the tenant was to receive for undertaking the work was the right to occupy the sawmill for three years without being required to pay any rent. The benefit of the three-year rent-free period was consideration clearly and directly linked to the undertaking to carry out the work. Repairs were done merely pursuant to the terms of the lease.

## *Example 7 - economic value and independent identity*

85. *Franchisor supplies certain rights to Franchisee under a franchise agreement. Franchisee pays \$10,000 for each year of the agreement, undertakes to sell only specified products for specified prices, and undertakes not to operate outside a particular geographical area.*

86. *The true character of the transaction is for the supply by Franchisor of certain rights in return for a monetary payment. The obligations Franchisee enters into are in the nature of defining and describing the supply by Franchisor. Although, when viewed in isolation they may meet the definition of both 'supply' and*

*'consideration', they do no more than define what Franchisor is supplying.*

*Things used to make a supply*

87. The recipient of a supply may provide or make a thing available for the supplier to use in making the supply. However, the thing does not necessarily form consideration.

*Example 8 - things used in making the supply*

88. *Eddie Engineer ('Eddie') agrees to supply services to Mountain Miners ('Mountain') at a rate of \$100 per hour. Under the agreement, Eddie must perform the services on Mountain's premises in Melbourne. Mountain agrees to allow Eddie to use its computer facilities, stationery and safety equipment on Mountain's premises to perform the services. Mountain also agrees to fly Eddie to Melbourne and provide accommodation and meals during the period Eddie performs the services.*

89. *There is monetary consideration for Eddie's services (\$100 per hour). The provision of the use of computer facilities, stationery and safety equipment and the transport, accommodation and meals is not part of the price paid for the services as it is not a payment or benefit to Eddie in return for his services. They are rather conditions of the contract that go to defining the supply made by Eddie, and are used in providing the services, rather than being supplied to Eddie in return for the services. They do not provide an economic benefit to Eddie in return for his supply. The provision of these things in these circumstances is therefore not consideration in connection with the supply by Eddie. Therefore, there is no non-monetary consideration for Eddie's supply.*

90. *However, if Mountain agreed in addition to provide holiday accommodation for Eddie at the Gold Coast on his way home, this would constitute non-monetary consideration. It is not something required for Eddie to supply the services to Mountain and it provides Eddie with an economic benefit in return for his supply.*

91. *If Eddie incurred the transport, accommodation and meals and then oncharged those expenses to Mountain as part of his services, GST is payable on this oncharge as they represent additional costs for the supply of Eddie's services.*

*Traded-in goods*

92. In respect of goods, there may be non-monetary consideration where title passes to the other party and the goods can be used for that

# GSTR 2001/D5

party's own purposes. In most circumstances, goods that are traded-in for new goods will be part of the consideration for those new goods. Title will generally pass where the goods go into a pool of goods rather than where the specific goods are reconditioned and returned. Also, where it is a condition of the agreement that the goods are provided, they will generally have an independent identity and be of economic value.

93. For example, in the UK case of *Customs and Excise Commissioners v. Sai Jewellers* [1996] BVC 140, Macpherson of Cluny J in the Queen's Bench Division considered issues arising where the supply of new articles of jewellery were made from old gold provided by a customer and partly from additional gold from the jeweller's stock. His Honour had to determine whether a number of transactions involved either a service (of refashioning of the customer's jewellery) or a part exchange. If a transaction involved a part exchange then the value of the supply was to be the total value of the new article. There was no express agreement between the parties.

94. Macpherson of Cluny J decided that, in the circumstances, a transaction involved a supply of refashioning the old jewellery (rather than a part exchange), where mixing of the customer's own gold with other gold was not likely to any substantial extent. For transactions made in those circumstances, the customer's gold did not form non-monetary consideration. Hence, the supply by the jeweller is one of services, being the labour required to refashion the jewellery.

### *Example 9 - traded-in goods*

95. *Andrew, a motor mechanic, expressly agrees to replace the battery in Bart's car for \$100 provided Bart gives Andrew the old battery. If Bart does not give Andrew the old battery, Andrew will charge an additional \$10. Bart gives Andrew the old battery and pays \$100. It is provided in return for Andrew's supply and has an independent identity and economic benefit. Title in the old battery passes to Andrew and he can use it for his own purposes. The old battery is non-monetary consideration for the supply made by Andrew.*

### *Example 10 – no economic value to either party*

96. *Frank takes his car to Andrew's garage for a grease and oil change. The total price of the service is \$150 and this will not change regardless of whether Frank wants to keep the used oil or leave it to be disposed of by Andrew. Frank regards the used oil as just a waste product and believes Andrew will dispose of it as part of the service. Andrew also regards the used oil as a waste product to be disposed of as part of his service and it would make no difference to his charge if Frank wanted the used oil back. In this case, there is no nexus*

*between Frank's supply of the used oil and Andrew's supply of the service. The used oil is not non-monetary consideration for the supply made by Andrew.*

*The transaction that occurs*

97. You need to examine the character of the transaction that occurs and not what might have happened if it had been arranged differently for the purposes of identifying whether a payment is consideration for a supply. For example, a party receiving a supply under a transaction and having a particular obligation, may have had to pay more money had the transaction proceeded without its entry into the obligation. However, this fact alone will not determine that the obligation is consideration. In this sense, an obligation that is taken into account when negotiating what the consideration for a supply is to be, or is dependent upon, will not necessarily form consideration in itself.

98. For example, if a tenant did not have an actual or implied obligation under a lease to keep the leased premises in good repair, then it is likely that the landlord would require the tenant to make additional payments. However, this obligation is not consideration for the supply of the premises as it is not provided as compensation or value for the supply of the premises.

*Example 11 - dependent services*

99. *Large Ltd ('Large') outsources its accounting area to Fast & Friendly Accounting Pty Ltd ('Fast'). The agreement is on the basis that Large will provide the premises and equipment that Fast needs to perform the services. Fast is to use the premises and equipment only for the purpose of performing the services for Large. Fast acknowledges in the agreement that the amount it is charging for the services must take into account the fact that it is using Large's premises and equipment.*

100. *The use of the premises and equipment is not consideration for Fast's supply as there is no nexus between it and the supply by Fast. It does not have an independent identity such that it provides Fast with a benefit or value in return for its services.*

*Example 12 - dependent goods*

101. *PrettyPaint agrees to paint the interior of Peng's offices for \$10,000. Peng agrees to provide PrettyPaint with 1,000 cans of pink shimmer paint that PrettyPaint has advised will be enough to paint the offices.*

# GSTR 2001/D5

102. *The paint provided by Peng is not consideration for PrettyPaint's supply. PrettyPaint's supply is the service of painting the offices. Although PrettyPaint would have charged more money if it had to also supply the paint, this is not relevant in this particular transaction. The paint does not provide a benefit or value to PrettyPaint in return for its services.*

### *Form of and variations to an arrangement*

103. The form of the arrangement that a transaction is made under is not determinative (by itself) of what is the consideration for a supply. For example, the parties may exchange obligations in a separate and later agreement that effectively changes the details and circumstances of a supply under an earlier continuing agreement. In this case, a barter or exchange transaction is not made where the substance of the transaction is a supply for the consideration identified in the first agreement. Similarly, a variation to an agreement will not necessarily be non-monetary consideration.

### *Example 13 - form of the agreement*

104. *Rail Riders, a rail transport company, agrees to haul coal for Peak Power, a power station, in return for a monetary amount. It is calculated according to a formula that takes into account a variety of factors, including the amount of coal and how long it takes Peak Power to unload the coal.*

105. *A year later, the parties make a further separate agreement that Rail Riders will use special equipment to haul the coal, and Peak Power will install and use corresponding special equipment to unload the coal. The equipment belongs to and remains the property of Rail Riders. No money or ownership of property passes in the later agreement. There are mutual maintenance obligations in respect of each party's own property and a confidentiality clause in respect of the special equipment.*

106. *Although there is a separate agreement that points initially to a separate supply for consideration, the transaction is in substance a supply of the service of hauling coal for monetary consideration. The later agreement merely alters the details of the supply specified in the earlier agreement and does not give rise to non-monetary consideration.*

### *No contractual obligation to make a payment*

107. The presence of a binding contractual obligation is not necessary to establish that a payment is non-monetary consideration

for a supply if goods, services or some other benefits pass between the parties.<sup>43</sup> However, the existence of such an obligation is relevant in determining whether there is a nexus between the payment and the supply.

108. The nature and value of the payment is also relevant. For example, where the provision of a payment is quite clearly no more than the mere recognition of a supply made for no charge, it will not be non-monetary consideration. For the payment to be a gift it must be transferred to the supplier voluntarily. It must not be subject to any contractual obligation and the party cannot receive anything material for the giving of the gift.<sup>44</sup>

109. Where a service is supplied voluntarily and an in-kind payment in the form of a presentation or ‘gift’ is made to the supplier of the service, the presentation will be non-monetary consideration for the supply, if it is in connection with, in response to or for the inducement of the supply. A presentation that does not satisfy this test does not have sufficient nexus with the supply. It is made merely as a gesture of appreciation to the supplier of the service rather than being for the supply.

110. It is not the value of a presentation that determines (by itself) the character of the in-kind payment as consideration. Regardless of how small its value, a presentation will be consideration for a supply if it has sufficient nexus with a supply. However, as a means of minimising compliance costs, we recognise that a presentation of smaller value in these circumstances is more likely to be a mere gesture of appreciation, rather than being consideration for the supply for GST purposes. Accordingly, you may treat a non-monetary presentation with a GST inclusive market value of \$55 or less made to a supplier (who voluntarily supplies their services and where the presentation is not made under an obligation), as not being consideration for the supply.<sup>45</sup>

---

<sup>43</sup> This view has been previously expressed in paragraph 33 of Goods and Services Tax Ruling GSTR 2000/11 (Goods and services tax: grants of financial assistance).

<sup>44</sup> See *FCT v. McPhail* (1968) 117 CLR 111 at 117.

<sup>45</sup> A taxable supply made for non-monetary consideration with a GST inclusive market value of \$55, has a value of \$50 for the purposes of calculating GST payable on the supply. The amount of \$50 is also referred to in section 29-80, that is about tax invoices and adjustment notes not being required for low value transactions. Note also that paragraph 12-190(4)(b) of Schedule 1 of the *Taxation Administration Act 1953* sets an amount of \$50 as the amount of the payment for a supply below which the payer need not withhold a Pay As You Go (PAYG) amount.

# GSTR 2001/D5

## *Example 14 - sufficient nexus*

111. *A professional accounting association invites Alan, an accountant in public practice, to speak at its annual conference. Alan provides his services without charge. To recompense speakers for their efforts, the association presents each of them with a book.*

112. *Alan makes a supply of a service. In return, he receives a payment in the form of a book that has a market value of \$100. As the book has a GST inclusive market value that is greater than \$55, Alan needs to determine whether there is a sufficient nexus between the book and the supply he makes. The association is not under any contractual obligation to provide Alan with the book and Alan may have no expectation that goods or some other benefit will pass to him. However, the book is not a true gift for Alan's expert services as its receipt is conditional upon Alan giving the talk. There is a sufficient nexus between the giving of the speech and the provision of the book to make it consideration for the supply of Alan's services.*

113. *If the GST inclusive market value of the book is instead \$55 or less, then Alan does not have to determine whether there is a sufficient nexus between the book and the supply of services that he makes. He may treat the book as not being consideration for his supply*

## *Unconditional incentives and promotional giveaways*

114. *A non-monetary payment is sometimes made by an entity (such as a manufacturer) to induce another party to make or continue to make purchases from the entity. Where the payment is truly unconditional (that is, a gift), it is not consideration for a supply by that other party.<sup>46</sup> In these circumstances, the non-monetary payment is also not a supply made for consideration.*

## *Example 15 – unconditional promotional giveaways*

115. *Machinery Pty Ltd (MPL) is an established business that sells various types of industrial machines to a large range of clients. Client retention is an important part of MPL's operations. As part of this policy, on the anniversary of the commencement of its business, MPL gives selected clients a ticket to attend a high profile sporting or entertainment event. The tickets are provided on an unconditional basis. In this case, there is no consideration for the supply by MPL of the tickets.*

---

<sup>46</sup> See, for example, paragraph 58 of Goods and Services Tax Ruling GSTR 2000/19 (Goods and services tax: making adjustments under Division 19 for adjustment events).

***Is the consideration monetary or non-monetary?***

116. The true character of the transaction is relevant to determining whether a payment is non-monetary consideration, rather than it being a supply for monetary consideration under a separate transaction. Where parties make supplies to each other, depending on the actual transaction, the supply made by each party may be for:

- monetary consideration; or
- non-monetary consideration, being the supply by the other party; or
- both monetary and non-monetary consideration; or
- no consideration.

117. Where there are mutual supplies for monetary consideration the GST law does not allow the price for one supply to be reduced by the price of another.<sup>47</sup>

***Example 16 - both monetary and non-monetary consideration***

118. *Notorious Newspapers ('Notorious') agrees to give Horatio Helpers Ltd ('Horatio') advertising space in the newspaper it publishes. Horatio agrees to paint the interior of Notorious's offices. Each party would normally charge \$1,000 for the supply it makes. Each party agrees to charge the other party \$5 for the supply it makes, on the condition that it pays \$5 for the supply from the other party.*

119. *The circumstances of the arrangement show that each supply is in connection with the other supply and will therefore form part of the consideration for that other supply. The consideration for Notorious's supply is both monetary consideration (\$5) and non-monetary consideration (Horatio's painting services). The consideration for Horatio's supply is monetary consideration (\$5) and non-monetary consideration (Notorious's advertising services).*

***Non-monetary consideration does not itself need to be a taxable supply***

120. Section 195-1 states:

'GST inclusive market value of:

- (a) consideration in connection with a supply; or

---

<sup>47</sup> This view has been previously expressed in Goods and Services Tax Ruling GSTR 2000/10 (Goods and services tax: recipient created tax invoices) at paragraph 51.

# GSTR 2001/D5

(b) a thing, or a supply or acquisition of a thing;

means the market value of the consideration or thing, without any discount for any amount of GST or luxury car tax payable on the supply.’

121. The effect of this provision is that, for the purpose of working out the price of a taxable supply under subsection 9-75(1), the market value of any non-monetary consideration is not reduced by the amount of GST payable on the supply to which the non-monetary consideration is connected. This is in line with paragraph 9-75(1)(a) that provides that price, so far as the consideration is expressed as an amount of money, is ‘the amount (without any discount for the amount of GST (if any) payable on the supply)’.

122. The GST treatment of non-monetary consideration (when it is viewed as a supply itself) is not relevant to its status as consideration. Circumstances in which the GST treatment is not relevant include where non-monetary consideration is received from an entity that is not registered for GST purposes, or is a GST-free or an input taxed supply.

*Example 17 - non-monetary consideration is itself a GST-free supply*

123. *Jana supplies a case of soft drink with a market value of \$110 to Wendy, in return for a case of mangoes with a market value of \$110. The price for the taxable supply of the soft drink is the market value of the mangoes, that is, \$110. GST on the taxable supply of the soft drink is 10% of 10/11 of the GST inclusive market value of the mangoes, that is, 10% of 10/11 x \$110 = \$10. The GST treatment of the mangoes as a supply is not relevant when looking at the mangoes as consideration for a supply. This is despite the fact that the supply of the mangoes is GST-free and that subsection 9-75(1) does not apply to Wendy’s supply of the mangoes.*<sup>48</sup>

## **Is non-monetary consideration itself a supply made for consideration?**

124. A thing that forms non-monetary consideration is itself a supply made for consideration.

*Example 18 - consideration is itself a supply for consideration*

125. *Top Team Pty Ltd agrees to provide advertising services for High Flyer Ltd in return for 30 economy class return flights between Brisbane and Sydney. Top Team Pty Ltd is making a supply of*

---

<sup>48</sup> Section 38-2.

*advertising services. The supply is made for consideration of the flights. High Flyer is making a supply of the flights. The consideration for this supply is the advertising services.*

126. The definition of supply excludes a supply of money unless the money is provided as consideration for a supply that is a supply of money.<sup>49</sup> Therefore, where the consideration for a supply is money, the consideration will not itself be a supply unless the other supply is also money.

*Example 19 - money is not a supply*

127. *Chris sells goods to Stephanie for \$100. Chris is making a supply for consideration of \$100. However, a supply of money is excluded from the definition of supply. Therefore, Stephanie is not making a supply.*

### **Apportionment of non-monetary consideration**

*Transaction involving money*

128. A supply by one entity to another is sometimes made for consideration consisting of an in-kind payment, (of lesser value than the supply) together with an amount of money. In these circumstances, the provision of the lesser value in-kind payment is itself a supply for consideration by the other entity.

129. This type of transaction was illustrated in Example 2 at paragraph 22 of this Ruling, where Steve's Faxes Pty Ltd supplies a fax machine (GST inclusive market value of \$660) to Lil's Cycle Shop for consideration comprising a bicycle and \$110 in money. In providing the bicycle as part consideration, Lil is also making a supply for consideration.

130. However, as the fax machine is provided by Steve in connection with both the money and the bicycle, the GST inclusive market value of the fax machine needs to be apportioned to determine the consideration for the supply of the bicycle. The apportionment is made by deducting the amount of money from the GST inclusive market value of the fax machine. Consequently, the consideration for the bicycle (\$660 less \$110) is \$550.<sup>50</sup>

---

<sup>49</sup> Subsection 9-10(4).

<sup>50</sup> The GST payable on the supply of the bicycle is \$50; see GST calculation table at paragraph 18 of this Ruling.

# GSTR 2001/D5

## *Transaction involving no money*

131. Where a single in-kind payment is provided as consideration for a supply consisting of more than one identifiable part, you will need to apportion the consideration between the parts of the supply, if part of the supply is taxable and another part of the supply is GST-free, input taxed or otherwise non-taxable.

132. For example, where an entity makes a supply consisting of a car and a motorised wheelchair to another entity for a boat (as consideration), the GST inclusive market value of the boat needs to be apportioned between the car and the wheelchair. GST is only payable on the part of the supply that is taxable (that is, the car).

133. The method of apportioning the consideration (that is, the GST inclusive market value of the boat) between the car and the wheelchair is to determine the GST inclusive market values of both the car and the wheelchair. The consideration should be then apportioned between the two in accordance with the proportion that the value of each bears to the total value of the two.

## **Valuation of non-monetary consideration**

134. Where the consideration for a supply is non-monetary, the GST inclusive market value of that consideration is used to work out the price and value of the supply.<sup>51</sup> Also, in most circumstances where parties are dealing at arm's length, it is reasonable to treat the goods, services or things exchanged in a transaction as being of equal value.

135. As the GST inclusive market value of consideration will be shown as the price on any tax invoice that the supplier issues, the onus for determining the GST inclusive market value of the consideration rests with the supplier.

136. In *Spencer v. Commonwealth of Australia* (1907) 5 CLR 418, the High Court of Australia looked at valuation methods and recognised the concept of a 'willing buyer and willing seller'. Griffith CJ stated:

‘...the test of value of land is to be determined, not by inquiring what price a man desiring to sell could actually have obtained for it on a given day, i.e., whether there was in fact on that day a willing buyer, but by inquiring “What would a man desiring to buy the land have had to pay for it on that day to a vendor willing to sell it for a fair price but not desirous to sell?”’<sup>52</sup>

<sup>51</sup> Paragraph 9-75(1)(b). ‘GST inclusive market value’ is defined in section 195-1.

<sup>52</sup> (1907) 5 CLR 418 at 432.

137. Market value is regarded as the price that would be negotiated at a specified time between a knowledgeable and willing but not anxious buyer and a knowledgeable and willing but not anxious seller acting at arm's length in an appropriate market. It is an objective test and not the subjective view of any one party.<sup>53</sup>

138. Depending on the context or circumstances of a transaction, it may be necessary to value the consideration by reference to either a general market or a particular market. For example, a wholesaler who (in making a supply to a retailer) receives consideration in a non-monetary form, should value that consideration by reference to the price for which he/she would normally buy that product or service in a general market. If the wholesaler normally bought the product or service from a manufacturer, the trade market is the market in which it should be valued. If the wholesaler normally bought that product or service from a retail outlet, the retail market is the relevant market.

139. Problems can arise when there is no market or the value to the seller is different to that for the buyer. It does not matter whether there is only one buyer or seller or even if one or both are 'hypothetical'. Courts have determined that market value can be determined in these circumstances.<sup>54</sup>

140. You may determine the market value of non-monetary consideration for a taxable supply by applying a method that produces a reasonable reflection of the market value of the consideration. There will be situations where the methods used by parties differ according to their particular circumstances. Examples of reasonable methods include:

- the market value of an identical good, service or thing;
- the market value of a similar good, service or thing;
- the market value of the supply; or
- a professional appraisal.

*The market value of an identical good, service or thing*

141. If an identical good, service or thing exists in the market, then the market value can be the actual price of that identical good, service or thing in that market. The price of the goods, services or things being compared needs to be representative of the market value in the market in which you are dealing.

---

<sup>53</sup> For example, see *Raja Vyricherla Narayana Gajapatiraju v. The Revenue Divisional Officer Vizagapatam* [1939] AC 302.

<sup>54</sup> For example, see *Federal Commissioner of Taxation v. St. Helens Farm (ACT) Pty Ltd* (1981) 11 ATR 544 at 562; 81 ATC 4040 at 4050.

# GSTR 2001/D5

## *Example 20 - the market value of an identical good or service*

142. *Grove Gourmet Restaurant is refurbishing its dining area and purchases 20 tables and 80 chairs from a local furniture manufacturer. In return, the restaurant agrees to provide a Christmas banquet for all of the staff of the manufacturer. The price of the taxable supply of the banquet made by the restaurant is equal to the GST inclusive market value of the consideration, being the tables and chairs provided by the retailer.*

143. *This could be determined by the amount of money that the restaurateur would ordinarily pay for the identical tables in the trade market in which it normally purchases such furniture. The price of the taxable supply of the tables and chairs will be equal to the GST inclusive market value of the consideration, being the banquet provided by the restaurant. This could be determined by the amount of money that the manufacturer would ordinarily pay for an identical banquet.*

## *The market value of a similar good, service or thing*

144. You may seek to identify a similar good, or service or thing from which the GST inclusive market value can be obtained.

145. A similar good, service or thing needs to closely resemble the good, service or thing that is required to be valued in the first instance. It needs to be able to take the place of the original good, service or thing and perform in a similar way. Matters that are relevant in considering the degree of similarity include the nature of the good, service or thing, the use to which it is put, its cost, location, size, quality and composition.

## *Example 21 - the market value of a similar good, service or thing*

146. *An accountancy firm agrees to prepare the books for a computer programmer for the 2000/2001 financial year. In return, the computer programmer designs a specific computer program for the accountancy firm. The taxable supply of the accountancy services is for the consideration of the specific computer program. As there is no identical computer program available for valuation purposes, reference may be made to the price of a similar computer program performing similar functions.*

*The market value of the consideration by reference to the market value of the supply*

147. Where the consideration is difficult to value (for example, a transaction involving an intangible) and where the market value of the supply is readily ascertainable, you may determine its market value by reference to the market value of the supply. Using this method, the market value of the non-monetary consideration will be determined by reference to the market value of the supply. However, if there is any monetary consideration provided in relation to that supply, you need to make an appropriate adjustment.

*Example 22 - the market value of the supply*

148. *A freeway service station offers a free meal to any coach driver who brings their coach to the service station with at least 20 passengers and stays for half an hour. The meal provided to the coach driver is a taxable supply with the consideration being his services of bringing the coach to the service station. The market value of the consideration can be determined by the value of the supply. The value of the consideration is determined by the value of the free meal, that is, the price that the driver normally pays for the meal.*<sup>55</sup>

*Professional appraisal*

149. A professional appraisal directed at determining the market value of the consideration for your supply will be a reasonable method where it:

- is done by a person who is recognised in the particular field in which the appraisal is being given as having the requisite skills and knowledge for the task; and
- uses valuation methodologies that are appropriate for that purpose.

*Other reasonable methods*

150. Where you are making a taxable supply and you are dealing with another party at arm's length, you can use a reasonable valuation method as determined between you and the other party. Also, where both the supply and the consideration are difficult to value (for example, a forbearance may have no identifiable market), then you can calculate a reasonable market value for the non-monetary consideration.

---

<sup>55</sup> See *Customs and Excise Commissioners v. Westmorland Motorway Services Ltd* [1997] BVC 198.

*Example 23 - valuing consideration by other reasonable methods*

151. *Gus is an inventor living in Queensland. He has patented a new and unique widget and contracts with MegaMake, a large manufacturing company, to produce a sample of 1,000 widgets. Under the agreement Gus does not make any monetary payment to MegaMake for its services. Instead, as consideration, he allows MegaMake to keep half of the widgets produced and gives it the right to sell them outside Queensland.*

152. *The supply of the manufactured widgets by MegaMake is for the consideration provided by Gus of the right to produce and sell the widgets interstate. The widget is a new and unique item and there is no identical or similar good in the market. MegaMake can demonstrate that it is appropriate to use a cost plus margin method (that is, the sum of the cost of producing and a relevant profit margin) for the production of the widgets it supplies to determine the market value of the consideration provided by Gus.*

153. We do not consider that the use of ‘historical cost’ or ‘residual value’ are acceptable methods of determining the market value of consideration. These are normally values for accounting purposes and do not represent the actual market price that would be obtained if the asset were sold.

## **Time when the GST inclusive market value of non-monetary consideration is worked out**

154. In general, the market value of things fluctuates over time. Therefore, the time for which the market value of non-monetary consideration is worked out will usually affect the value.

155. The GST Act does not specify the time for which the market value of non-monetary consideration is to be ascertained for the purposes of working out the value of the supply under paragraph 9-75(1)(b). We consider that the time must be reasonable in the circumstances of a particular transaction. Depending on the circumstances, it may be:

- when parties enter into a binding agreement;
- when economic risk is transferred; or
- when a recipient assumes effective control.

156. You need to be able to demonstrate that these times, or another time at which you value the consideration, is reasonable in your particular circumstances.

157. The process of valuing non-monetary consideration can be done before or after the appropriate time as long as it reflects the GST inclusive market value at the time when it should be determined. For example, if you value non-monetary consideration for the purposes of entering into an agreement and that value reasonably reflects the value as at the time the agreement is made, you can use it to work out the value of your supply. However, it is not reasonable to use this value if you enter the agreement on the basis that the market value has changed from a value established before you entered the agreement.

158. In practical terms, you need to value any non-monetary consideration before you can work out the GST on a taxable supply or issue a tax invoice.

159. A change in the market value of non-monetary consideration, after the time as at which you need to establish the market value, is not an adjustment event for the purposes of paragraph 19-10(1)(b). It is not an event that has the effect of changing the consideration for a supply or acquisition. It is only the market value of the consideration that has changed.

160. These guidelines for the timing of your valuation are the same whether you account for GST on a cash or non-cash basis.

### **Application of the attribution rules where consideration is non-monetary**

161. The basic rules for attributing GST payable, input tax credits and adjustments are set out in Division 29.<sup>56</sup> These rules apply whether the consideration that is received or provided for a taxable supply or creditable acquisition is monetary and/or non-monetary.

162. If you account for GST on a non-cash basis, then the GST payable or the input tax credit to which you are entitled, is attributable to the tax period in which:

- you receive or provide *any* of the consideration, or
- an invoice is issued,

whichever is the earlier.<sup>57</sup>

### ***Invoices and non-monetary consideration***

163. An agreement providing for consideration to be paid in kind can be an invoice that triggers attribution of the GST payable and

---

<sup>56</sup> See Goods and Services Tax Ruling GSTR 2000/29 (Goods and services tax: attributing GST payable, input tax credits and adjustments and particular attribution rules made under section 29-25) for the basic rules on attribution.

<sup>57</sup> Subsections 29-5(1) and 29-10(1).

input tax credits. This is the case whether or not the market value of the consideration is stated in the agreement.

164. If you account for GST on a non-cash basis and an invoice relating to a supply is issued before any of the consideration is received, you account for GST payable and input tax credits in the tax period in which the invoice is issued.<sup>58</sup> An invoice is issued if the supplier sends a document to the recipient that notifies the obligation to pay, or if the recipient is given a copy of such a document.<sup>59</sup>

165. A document notifying an obligation to pay non-monetary consideration for a supply can be an invoice. The fact that the consideration is non-monetary does not mean that the document cannot be an invoice for GST purposes. The definition of an invoice for GST purposes is ‘a document notifying an obligation to make a payment’.<sup>60</sup> The term ‘payment’ is not defined in the GST Act but its meaning is not restricted to payments of money.<sup>61</sup>

### *When is consideration received or provided?*

166. To apply the basic attribution rules to transactions where the consideration is monetary and/or non-monetary, you need to identify when the consideration is received or provided. This is a question of fact and depends on the terms of the agreement and all the circumstances. The basic attribution rules differ depending on whether you account for GST on a cash or non-cash basis.

### *Accounting on a non-cash basis - when is **any** consideration received or provided?*

167. If you account for GST on a non-cash basis, attribution is triggered fully when *any* of the consideration is received or provided before an invoice is issued.

### *Example 24 – time of consideration if you account on a non-cash basis*

168. *Rene is to receive 25,000 bricks from Honza as consideration for the taxable supply of a computer. Both Rene and Honza account for GST on a non-cash basis and have quarterly tax periods. In September 2001, Rene picks up one pallet of the bricks from Honza’s*

<sup>58</sup> Paragraphs 29-5(1)(b) and 29-10(1)(b).

<sup>59</sup> For further information about the Commissioner’s views on what is an invoice, see Goods and Services Tax Ruling GSTR 2000/34 (Goods and services tax: what is an invoice for the purposes of the *A New Tax System (Goods and Services Tax) Act 1999*).

<sup>60</sup> Section 195-1.

<sup>61</sup> See paragraph 12 of this Ruling.

*business premises. The rest of the bricks are delivered to Rene in October 2001.*

169. *Rene receives and Honza provides any of the consideration for the supply of the computer when Rene picks up the first pallet of bricks. Therefore, Rene attributes 1/11<sup>th</sup> of the GST inclusive market value of the 25,000 bricks to the tax period ending 30 September 2001. Honza is entitled to an input tax credit for the same amount and in the same tax period (provided he holds a tax invoice and has acquired the computer for a creditable purpose).*

*Accounting on a cash basis - to what extent is consideration received or provided?*

170. If you account for GST on a cash basis, you attribute GST payable and input tax credits to a tax period in which the non-monetary consideration for the taxable supply or creditable acquisition is received or provided. However, GST payable and input tax credits are attributable only *to the extent* that the consideration is received or provided in that tax period.

171. If the non-monetary consideration for a supply or acquisition is received or provided in more than one tax period, it is necessary to work out the extent to which the consideration in the form of goods or services or any other thing is received or provided in each tax period.

172. The extent to which consideration in the form of goods is received or provided in a particular tax period is based on the quantity of goods received or provided in that tax period.

173. The extent to which consideration in the form of services is received or provided in a particular tax period is based on the extent to which the services are performed in that tax period. This may be established, for example, by working out the extent to which the provider of the consideration would be entitled to issue an account for its services, or the extent to which it would be entitled to sue for the value of the work performed.

174. Similar guidelines were applied in Goods and Services Tax Determination GSTD 2000/3 (Goods and Services Tax: transitional arrangements: to what extent is the supply of services made on or after 1 July 2000, where the supply spans that date?). Although this Determination deals with transitional arrangements, the guidelines can be used also where non-monetary consideration is in the form of services. Records and events that may assist in identifying when services are performed include time sheets and progress payments.

175. If you cannot quantify exactly the extent to which non-monetary consideration is received or provided in a particular tax

# GSTR 2001/D5

period, you may make a reasonable estimate, supported by documentary evidence where appropriate.

## *When goods are received or provided*

176. Goods are received by, or provided to, an acquirer or a third party on the acquirer's behalf, when the title to the goods is transferred, or physical possession of the goods passes, whichever is the earlier.

## *Example 25 – possession of goods passes*

177. *Don is to receive office furniture from Vanessa as consideration for a supply of advertising services. Don and Vanessa are registered and both account for GST on a non-cash basis every quarter. On 31 March 2002, a courier picks up the office furniture from Vanessa's shop on Don's behalf. The goods are not delivered to Don by the courier until the following day, that is, 1 April 2002.*

178. *The consideration for the supply of advertising services by Don is both received and provided on the day on which the courier physically removes the office furniture from Vanessa's premises. Don attributes the full amount of GST payable on his supply of advertising services to the tax period ending 31 March 2002. Vanessa is entitled to an input tax credit for the same amount in the same tax period, (provided she holds a tax invoice) for her creditable acquisition of advertising services.*

## *Example 26 - title to goods passes*

179. *Jo agrees to supply services to Sue in return for a 'thingamewot', a machine that Sue manufactures. They agree that in view of the enormous size and storage requirements for the thingamewot, title will pass immediately but Jo can collect it any time within the next year.*

180. *Jo receives the thingamewot as consideration for her services when title passes, which is before she obtains possession of it.*

## *When services are received or provided*

181. In most cases, some of the services are received and provided when the provision of services is commenced. However, there may be situations where it is not clear whether the provision of services has actually commenced or whether what has been done amounts to preliminary activities only.

*Example 27 - preliminary activities*

182. *John is to receive consideration in the form of painting services from Bob in return for a supply of plumbing services. Bob purchases the paint, brushes and other materials that he requires to carry out the work. The following week, he cleans down the walls to be painted and then puts up the scaffolding. However, he does not begin to apply the paint until the next day.*

183. *John receives (and Bob provides) any of the consideration for his supply of plumbing services when the painting services commence. Bob's painting services commence when he arrives on-site and begins cleaning down the walls. The purchase of the paint, brushes and other materials are merely preliminary to the commencement of the painting services.*

184. There are many situations where consideration is in the form of services that result in the production of something tangible.<sup>62</sup> In cases such as these where the consideration for a supply involves both work being done and the creation of a product, the consideration is received and provided when the services that result in the creation of the product begin.

*Example 28 – services that result in the creation of a product*

185. *Michael enters an agreement to supply computers to Kylie, a consulting architect. She is to provide building plans for Michael's new shop as consideration.*

186. *If Michael accounts for GST on a non-cash basis, the full amount of GST payable on the supply of the computers is attributable to the tax period in which any of the consideration is received (if there was no previous issue of an invoice). Any of the consideration is received (or provided) as soon as Kylie commences drafting the plans, that is, before Kylie hands over the final plan to Michael. This is the case even if the contract is for Kylie to deliver a completed plan.*

187. *If Michael accounts for GST on a cash basis, GST payable is attributable to a tax period in which Kylie performs any services that culminate in production of the plans, but only to the extent that he is actually aware that the services are performed in that tax period.*

---

<sup>62</sup> The view that supplies such as these, which involve both work being done and the creation of a product, are supplies of services is further explained in Goods and Services Tax Ruling GSTR 2000/31 (Goods and services tax: supplies connected with Australia) at paragraphs 69 to 70.

# GSTR 2001/D5

## *When other things are received or provided*

188. Consideration in the form of a conveyance of real property under a standard land contract is received and provided when settlement occurs. ‘Settlement’ refers to that stage in the completion of a standard land contract where the transfer in the purchaser’s favour and certificate of title are exchanged for the purchase price.<sup>63</sup>

189. Where consideration is the creation, grant, assignment or surrender of a right, the consideration is received and provided when the right is created, granted, assigned or surrendered. The question of what is the act that creates, grants, assigns or effects a surrender of a right is one of fact and depends on the terms of the agreement.

190. Where consideration is entry into, or release from an obligation, the consideration is both received and provided when the obligation is entered into or the release is effected. The question of what is the act that effects entry into, or release from an obligation, is again one of fact.

## ***Progressive or periodic supplies and acquisitions***

191. Division 156 applies to supplies or acquisitions made for a period or on a progressive basis, where the consideration is also provided on a progressive or periodic basis. It alters the application of the basic attribution rules by treating each progressive or periodic component of the supply or acquisition as a separate supply or acquisition.<sup>64</sup>

192. To attribute GST payable on a supply to which Division 156 applies, it is necessary to identify the consideration for each component of the supply. This treatment is for attribution purposes only, to attribute GST for each notional supply or acquisition. Where the consideration is non-monetary you need to value the consideration once and not each component of the consideration as it is received.

## *Example 29 – one valuation of the consideration*

193. *On 1 July 2001, Misum agrees to supply China Blue with five floral arrangements each week for a 12-month period. As consideration, China Blue will supply Misum with a vase at the end of each quarterly tax period.*

---

<sup>63</sup> See Goods and Services Tax Ruling GSTR 2000/28 (Goods and services tax: attributing GST payable or an input tax credit arising from a sale of land under a standard land contract).

<sup>64</sup> For further information on the operation of Division 156, see Goods and Services Tax Ruling GSTR 2000/35 (Goods and services tax: Division 156 - supplies and acquisitions made on a progressive or periodic basis).

194. *Division 156 applies to the supply of the floral arrangements. Misum needs to establish the market value of the vases as at 1 July 2001 (the date on which the agreement is entered into). The market value of the four vases at this date is \$1,100.*

195. *Misum will use this market value to attribute GST on her supply of floral arrangements, even if the market value of the vases is different at the time she receives them. She will attribute \$25 (that is,  $\$1,100 \times 1/11 \times 1/4$ ) GST on her supply of flowers to each quarter.*

*Where the components are not readily identifiable*

196. Division 156 states that where the periodic or progressive components of a supply are not readily identifiable, they ‘correspond to the proportion of the total consideration for the supply that the separate amounts of consideration represent’.<sup>65</sup>

197. However, where you receive non-monetary consideration, it may be difficult to identify the periodic components of the supply that you make by relying on the ‘proportion of the total consideration that the separate amounts of consideration represent’ because there are no separate amounts of consideration. For example, where consideration is in the form of services provided continuously over a period you cannot identify separate amounts of consideration. In these circumstances, the progressive or periodic components of the supply that you make correspond to your tax periods.

*Example 30 – components are not readily identifiable*

198. *Jenny is an accountant and land developer and Robert is a surveyor. Jenny agrees to provide Robert with a year’s supply of accounting services in return for a year’s supply of surveying services. Both Jenny and Robert account for GST on a non-cash basis. Jenny lodges GST returns on a monthly basis and Robert has quarterly tax periods.*

199. *The components of the supplies are not readily identifiable because the services are provided as and when required. The periodic components of her supply correspond with her monthly tax periods. (Jenny accounts for GST on a monthly basis.) Therefore, each month she attributes GST payable in respect of 1/12 of the GST inclusive market value of the total surveying services she receives over the year.*

200. *Robert accounts for GST on a quarterly basis. The periodic components of his supply correspond with his quarterly tax periods. Therefore, in each quarterly tax period, Robert attributes GST*

---

<sup>65</sup> Subsection 156-5(2).

# GSTR 2001/D5

*payable in respect of 1/4 of the GST inclusive market value of the total accounting services he receives from Jenny over the year.*

## ***Adjustment events***

201. An adjustment event is any event that has the effect of:<sup>66</sup>

- cancelling a supply or an acquisition; or
- changing the consideration for a supply or an acquisition; or
- causing a supply or acquisition to become, or stop being, a taxable supply or creditable acquisition.

202. When any of these events occur, you may have accounted for too much (or not enough) GST for a supply, or too much (or not enough) input tax credit for an acquisition. If this is the case you may have to make an adjustment.

203. An adjustment does not always arise from an adjustment event. One of the requirements for an adjustment is that the GST on the supply, or the input tax credit on the acquisition, was attributable to an earlier tax period.<sup>67</sup> Where the adjustment event occurs in the same period in which the GST on the supply or the input tax credit on the acquisition is attributable, this requirement is not met. Changes in your GST payable or your input tax credits resulting from these adjustment events are accounted for in calculating your GST payable or your input tax credits for the period. Where the event does not give rise to an adjustment, you do not need to issue an adjustment note.<sup>68</sup>

204. In the example at paragraph 32 of this Ruling, Arthur and Bella agree to substitute goods for the \$1,000 that Bella owes Arthur.<sup>69</sup> In this example, the consideration for the supply made by Arthur to Bella has changed from monetary to non-monetary, and triggers an adjustment event.

205. If this adjustment event has occurred in the same period in which the GST on the supply or the input tax credit on the acquisition is attributable, no adjustment arises.

---

<sup>66</sup> Subsection 19-10(1).

<sup>67</sup> For a supply, see paragraph 19-40(b). For an acquisition, see paragraph 19-70(b).

<sup>68</sup> A more detailed explanation of adjustment events and adjustments is contained in Goods and Services Tax Ruling GSTR 2000/19 (Goods and services tax: making adjustments under Division 19 for adjustment events).

<sup>69</sup> As Bella's supply of goods to Arthur is a taxable supply, she issues a tax invoice to Arthur.

206. Also, if the adjustment event occurs in a later tax period, no adjustment arises where the GST inclusive market value of the goods provided by Bella is equal to \$1,000. However, an adjustment arises if the GST inclusive market value of the goods at the date of substitution differs from \$1,000.<sup>70</sup>

***Adjustment for bad debts under Division 21***

207. Subsection 21-5(1) provides that you have a decreasing adjustment if:

- (a) you make a taxable supply; and
- (b) the whole or part of the consideration for the supply has not been received; and
- (c) you write off as bad the whole or a part of the debt, or the whole or a part of the debt has been overdue for 12 months or more.

The amount of the decreasing adjustment is 1/11 of the amount written off, or 1/11 of the amount that has been overdue for 12 months or more, as the case requires.’

208. However, according to subsection 21-5(2) you cannot have an adjustment under the section if you account on a cash basis. For further information on the operation of Division 21, see Goods and Services Tax Ruling GSTR 2000/2 (Goods and services tax: adjustments for bad debts).

209. ‘Consideration’ in paragraph 21-5(1)(b) has the meaning given by sections 195-1 and 9-15. This meaning extends beyond monetary payments and includes payments, acts and forbearances.

210. Paragraph 21-5(1)(c) limits the operation of Division 21 to ‘debts’, that have been wholly or partly written off as bad, or that have been wholly or partly overdue for 12 months or more. One view of paragraph 21-5(1)(c) is that the word ‘debt’ relates to and encompasses all ‘consideration’ referred to in paragraph 21-5(1)(b). In other words, the intention of Division 21 is to cover non-monetary debts. This view is consistent with the ordinary meaning of the term ‘debt’, being ‘that which is owed; that which one person is bound to pay to or perform for another, a liability or obligation to pay or render something’.<sup>71</sup>

---

<sup>70</sup> Further explanations of ‘Adjustments for supplies’ and ‘Adjustments for acquisitions’ are provided at paragraphs 75 and 91 respectively of Goods and Services Tax Ruling GSTR 2000/19 (Goods and services tax: making adjustments under Division 19 for adjustment events).

<sup>71</sup> *The Macquarie Dictionary*, 1997 third edition.

# GSTR 2001/D5

211. However, this view is not consistent with some cases that were heard before the courts about the meaning of the term ‘debt’, that is, that unless there is an amount of money owed, there is no debt.<sup>72</sup>

Under this stricter approach, Division 21 has no application at all in respect of non-monetary consideration that has not been received.

212. The High Court in *G E Crane Sales Pty Ltd v. FC of T* (1971) 126 CLR 177 considered the application of section 63 of the *Income Tax Assessment Act 1936* (‘ITAA 1936’). Menzies J stated at 186 that:

‘Now it is necessary to consider again the meaning of the word “debts” in s 63. In my opinion a taxpayer cannot write off as a bad debt an amount that is no longer a debt. “Debts”, in my opinion, mean moneys that the taxpayer is presently entitled to receive, except in cases for which s 63(2) may make special provision.’

213. Although the Court was not asked to consider the possible application of section 63 of the ITAA 1936 to non-monetary receivables, the judicial definition of ‘debt’ provided by Menzies J clearly limits its meaning to ‘moneys’.

214. Until legislative amendments were made in 1998, bad debt relief was available under the UK *Value Added Tax Act 1994* (‘VAT Act’) only where the consideration for the supply was ‘in money.’ The ‘in money’ requirement was legislative and the availability of bad debt relief did not turn on the meaning of the word ‘debt’. This restriction was removed after the Court of Justice of the European Communities in *Goldsmiths (Jewellers) Ltd v. Commissioners of Customs and Excise* [1997] BVC 494 ruled that the UK provision that contained the ‘in money’ requirement was not a valid exercise of a power to derogate from the rule about overpaid VAT contained in Article 11 (C)(1) of the Sixth Directive.

215. The distinction between monetary and non-monetary consideration was subsequently removed from the UK law with effect from July 1998. The requirement for a refund of the VAT (that unpaid consideration be written off in the supplier’s accounts as a bad debt) is now extended to non-monetary receivables by way of a regulation made under a provision in the VAT Act. Consideration may now be ‘*taken to have been written off as a bad debt*’.<sup>73</sup>

216. The development of the UK law in this regard does not challenge the strict legal meaning of the term ‘debt’, but extends bad

---

<sup>72</sup> See, for example, *G E Crane Sales Pty Ltd v. FC of T* (1971) 126 CLR 177 and *Director of Public Prosecutions v. Turner* [1973] 3 All ER 124. However, these cases did not deal with whether non-monetary consideration, that has not been received, is a debt.

<sup>73</sup> Regulation 172 of the *Value Added Tax Regulations 1995*.

debt relief to situations where consideration takes a non-monetary form. It is noteworthy that our GST legislation expressly does not restrict adjustments for bad debts to circumstances where there is only consideration that is ‘in money’, as did the VAT Act.

217. In this Ruling, we take the view that Division 21 includes within the ordinary meaning of the term ‘debt’, non-monetary consideration that has not been received. To do otherwise would produce unintended and anomalous outcomes. For example, an entity that has attributed GST for its taxable supply would not be able to claim a decreasing adjustment where the recipient has failed to provide any or all of the non-monetary consideration. Further, where the recipient of the supply has claimed an input tax credit for the acquisition, there will be no increasing adjustment, despite the recipient not providing any or all of the non-monetary consideration.

218. We are of the view that, unless the GST Act indicates otherwise, monetary and non-monetary consideration should be treated on the same basis. This approach gives practical effect to the intention of the GST Act and is consistent with a common sense and equitable outcome.

#### *Example 31 – non-monetary debt*

219. *Jared entered into an agreement with Lachlan to supply cameras in consideration for advertising services. Jared recorded the transaction in his accounts and (accounting on a non-cash basis) attributed the whole of the GST payable on the supply of cameras to the tax period in which Lachlan first provided some of the advertising services. However, Lachlan provided only part of the advertising services before going bankrupt.*

220. *Jared is entitled to a decreasing adjustment under Division 21 when the outstanding advertising services are written off as bad or become overdue for 12 months or more.*

#### **Record keeping requirements**

221. Section 70 of the *Taxation Administration Act 1953* sets out record keeping requirements of indirect tax transactions. Records that explain indirect tax transactions and acts relevant to the supply, importation, acquisition and dealing need to be retained for at least five years after the completion of the transactions or acts to which they relate. For example, you need to retain records that explain how you worked out the market value of any non-monetary consideration.
