## Notice of Withdrawal

---

### Income tax: expenditure on minor items of plant and equipment

Taxation Ruling IT 2264 is no longer current and should be withdrawn. It ceases to have effect from today.

With the introduction of prescriptive legislation in Subdivision 42-M to deal with plant whose cost is less than \$1000 and the special treatment that applies when a balancing adjustment event happens to that plant, the treatment previously extended to the mining and other large industry to allow an immediate write-off for plant items costing \$500 or less is no longer appropriate.
