

TD 2006/24 - Fringe benefits tax: what is the benchmark interest rate to be used for the fringe benefits tax year commencing on 1 April 2006?

 This cover sheet is provided for information only. It does not form part of *TD 2006/24 - Fringe benefits tax: what is the benchmark interest rate to be used for the fringe benefits tax year commencing on 1 April 2006?*

 This document has changed over time. This is a consolidated version of the ruling which was published on *5 April 2006*

Taxation Determination

Fringe benefits tax: what is the benchmark interest rate to be used for the fringe benefits tax year commencing on 1 April 2006?

❶ This Ruling provides you with the following level of protection:

This publication (excluding appendixes) is a public ruling for the purposes of the *Taxation Administration Act 1953*. A public ruling is an expression of the Commissioner's opinion about the way in which a relevant provision applies, or would apply, to entities generally or to a class of entities in relation to a particular scheme or a class of schemes. If you rely on this ruling, we must apply the law to you in the way set out in the ruling (or in a way that is more favourable for you if we are satisfied that the ruling is incorrect and disadvantages you, and we are not prevented from doing so by a time limit imposed by the law). You will be protected from having to pay any underpaid tax, penalty or interest in respect of the matters covered by this ruling if it turns out that it does not correctly state how the relevant provision applies to you.

Ruling

1. The benchmark interest rate for the fringe benefits tax (FBT) year commencing 1 April 2006 is 7.30 per cent per annum. This rate replaces the rate of 7.05 per cent that has applied for the previous FBT year.
2. The rate of 7.30 per cent is used to calculate the taxable value of:
 - a fringe benefit provided by way of a loan; and
 - a car fringe benefit where an employer chooses to value the benefit using the operating cost method.

Example

3. *On 1 April 2006 an employer lends an employee \$50,000 for five years at an interest rate of 5% per annum. Interest is charged and paid 6 monthly and no principal is repaid until the end of the loan. The actual interest payable by the employee for the current year is \$2,500 ($50,000 \times 5\%$). The notional interest, with a 7.30 per cent benchmark rate, is \$3,650. The taxable value is \$1,150 ($\$3,650 - \$2,500$).*

Note: *FBT does not apply to a loan in relation to a shareholder in a private company, or an associate of such a shareholder, that causes (or will cause) the private company to be taken under Division 7A of Part III of the Income Tax Assessment Act 1936 to pay the shareholder or associate a dividend.*

TD 2006/24

Date of effect

4. This Determination applies to the FBT year commencing on 1 April 2006.

Commissioner of Taxation

5 April 2006
