83 Section 152-200

Repeal the section, substitute:

152-200 What this Subdivision is about

This Subdivision tells you how to apply the small business CGT concessions mentioned in step 4 of the method statement in subsection 102-5(1).

A capital gain is reduced by 50% if the basic conditions in Subdivision 152-A are satisfied.

If the capital gain has already been reduced by the discount percentage, the 50% reduction under this Subdivision applies to that reduced gain.

The capital gain may be further reduced by the small business retirement exemption or a small business rollover, or both.

Alternatively, you may choose not to apply the 50% reduction and instead apply the small business retirement exemption or small business rollover.

None of these rules apply if the 15-year exemption already applies to the capital gain, since such a gain is disregarded anyway.

84 Section 152-300

Omit “The concession in section 152-205 (small business 50% reduction) applies”, substitute “You may choose not to apply the concession in section 152-205 (small business 50% reduction)”.

Omit “that offset exceeded the amount that would have been its income tax liability for that year if it did not have that offset (but had all its other tax offsets)”, substitute “some of the offset remained after applying section 63-10 (tax offset priority rules)”.

89 Subsection 205-70(2) (method statement, step 4)

Repeal the step, substitute:

Step 4. Work out the remaining amount of a *tax offset covered by paragraph (1)(c).

90 At the end of subsection 205-70(2) (after the note)

Add:

Example: The following apply to a corporate tax entity that satisfies the residency requirement for an income year:

- the entity's income tax liability for that year would be \$100,000 if its tax offsets were disregarded;
- for that year, the entity has a tax offset of \$60,000 under this section (the *franking deficit offset*) and a tax offset of \$80,000 in respect of overseas tax paid by the entity (the *foreign tax credit*).

Under section 63-10 (about tax offset priority rules), the foreign tax credit must be applied before the franking deficit offset is applied. As a result, that credit and \$20,000 of the franking deficit offset combine to reduce the entity's income tax liability to nil. The remaining \$40,000 of the franking deficit offset will be included in a franking deficit offset for the next income year for which the entity satisfies the residency requirement.

91 Subsection 205-70(3)
