electronic notice transmitted to the Regulator, relinquish any or all of those units.

- An administrative penalty is payable for non-compliance with a relinquishment requirement under this Act.

Division 2—Court-ordered relinquishment

66C Units issued as a result of fraudulent conduct—court may order relinquishment

Scope

- (1) This section applies if:
 - (a) one or more Australian-issued international units were issued:

Relinquishment

- (2) The court may, on application made by the Director of Public Prosecutions or the Regulator, order the person:

- (a) the units are cancelled; and
 - (b) the Regulator must remove the entries for the units from the person's Registry account or accounts in which there are entries for the units; and

Relinquishment of insufficient units

- (4) If, by the compliance deadline:
- (a) the person has relinquished one or more Australian-issued international units in order to comply with the requirement; and
 - (b) the number of relinquished units is less than the number of units required to be relinquished;

the person is liable to pay to the Commonwealth, by way of penalty, an amount worked out using the formula:

$$\left(\begin{array}{l} \text{Number of units} \\ \text{required to be} \\ \text{relinquished} \end{array} - \begin{array}{l} \text{Number of} \\ \text{relinquished units} \end{array} \right) \times \begin{array}{l} \text{Prescribed amount for} \\ \text{the financial year in} \\ \text{which the compliance} \\ \text{deadline occurs} \end{array}$$

where:

prescribed amount for the financial year in which the compliance deadline occurs means:

- (a) if the requirement arose before the end of 31 July 2013—\$46; or
- (b) if the requirement arose during the period beginning at the start of 1 August 2013 and ending at the end of 31 July 2014—\$48.30; or

Compliance

- (7) For the purposes of this section, a person relinquishes Australian-issued international units in order to comply with a particular requirement under this Act if, and only if, the notice of relinquishment specifies the requirement.
- (8) To avoid doubt, a person may be liable to pay a penalty under this section even if:
- (a) the person is not the registered holder of any Australian-issued international units; or
 - (b) the person is not the registered holder of the number of Australian-issued international units required to be relinquished.

Note 2: For a special rule about the order in which units are taken to have been surrendered, see subsection (7G).

(7B) If there are 2 or more unacceptable designated limit situations of the person for the relevant eligible financial year, subsection (7) is to be applied separately in relation to each of those designated limit situations:

- (a) in the order ascertained in accordance with a legislative instrument made by the Minister; or
- (b) if no instrument is in force under paragraph (a)—in the order that corresponds to the lowest-to-highest ranking of the respective designated limit percentages applicable to the relevant designated limits (that is, with the lowest designated limit percentage being ranked 1 and the second lowest designated limit percentage being ranked 2 and so on).

(7C) For the purposes of paragraph (7B)(b), if the same designated limit percentage is applicable to 2 or more designated limits:

- (a) those designated limit percentages are to be ranked in the order that corresponds to the alphabetical order of the names of the respective designated limits (for example, with a percentage applicable to a designated limit that has a name beginning with the letter A being ranked 1 and a percentage applicable to a designated limit that has a name beginning with the letter B being ranked 2 and so on); and
- (b) that ranking is taken to be a lowest-to-highest ranking of those designated limit percentages.

(7D) Subsection (7A) is to be applied after:

- (a) if there is only one unacceptable designated limit situation of the person for the relevant eligible financial year—subsection (7) has been applied; or
- (b) if there are 2 or more unacceptable designated limit situations of the person for the relevant eligible financial year—the last application of subsection (7).

(7E) For the purposes of this section, if:

- (a) the relevant eligible financial year is:
 - (i) the eligible financial year beginning on 1 July 2015; or

then:

- (d) there is an ***unacceptable general limit situation*** of the person for the relevant financial year; and
- (e) the eligible international emissions units covered by the situation are to be ascertained as follows:
 - (i) rank the units covered by paragraph (b) in the reverse consecutive order to the order in which the units were surrendered (that is, with the first most recently surrendered unit being ranked 1 and the second most recently surrendered unit being ranked 2 and so on);
 - (ii) identify the units ranked with a number that is less than, or equal to, the excess mentioned in paragraph (c);
 - (iii) the units identified under subparagraph (ii) of this paragraph are the units covered by the situation.

(7F) For the purposes of this section, if:

- (a) the relevant eligible financial year is:
 - (i) the eligible financial year beginning on 1 July 2015; or

- (d) the number of units covered by paragraph (c) exceeds the applicable designated percentage of the emissions number of the person for the relevant eligible financial year;

then:

- (e) there is an ***unacceptable designated limit situation*** of the person for the relevant financial year; and

- (f) the eligible international emissions units covered by the situation are to be ascertained as follows:
- (i) rank the units covered by paragraph (c) in the reverse consecutive order to the order in which the units were surrendered (that is, with the first most recently surrendered unit being ranked 1 and the second most recently surrendered unit being ranked 2 and so on);
 - (ii) identify the units ranked with a number that is less than, or equal to, the excess mentioned in paragraph (d);
 - (iii) the units identified under subparagraph (ii) of this paragraph are the units covered by the situation.
- (7G) For the purposes of this section, if 2 or more eligible international emissions units are surrendered at the same time, the units are taken to have been surrendered:
- (a) in the order ascertained in accordance with a legislative instrument made by the Minister; or
 - (b) if no instrument is in force under paragraph (a)—in the order that corresponds to the numeric order of the serial numbers of the units.

11 months ending on 31 May 2015

- (1AA) Within 7 business days after the end of 31 May 2015, the Regulator must publish on its website the amount worked out to 2 decimal places (rounding up if the third decimal place is 5 or more) using the formula:

$$\frac{\text{Total auction proceeds}}{\text{Number of units issued as the result of auctions}}$$

where:

number of units issued as the result of auctions means the total number of carbon units that were issued as the result of auctions conducted by the Regulator during the 11-month period ending at the end of May 2015.

total auction proceeds means the total amount paid or payable by way of charges for the issue of carbon units that were issued as the result of auctions conducted by the Regulator during the 11-month period ending at the end of May 2015.

- (1AB) For the purposes of this Act, the amount worked out under subsection (1AA) is taken to be the *average carbon unit auction price* for the 6-month period ending at the end of May 2015.

83 Paragraph 196(1)(a)

Omit “2015”, substitute “2016”.

84 After subsection 196(1)

Insert:

- (1A) For the purposes of this Act, the amount worked out under subsection (1) is taken to be the *average carbon unit auction price* for the 6-month period ending at the end of that May.

85 After subsection 196(2)

Insert:

- (2A) For the purposes of this Act, the amount worked out under subsection (2) is taken to be the *average carbon unit auction price* for the 6-month period ending at the end of that November.

Insert:

196A Per-tonne carbon price equivalent

- (1) Within 7 business days after the end of each designated 6-month period, the Regulator must publish on its website the per-tonne carbon price equivalent for the designated 6-month period.

Note: For *designated 6-month period*, see subsection (18).

Per-tonne carbon price equivalent—basic rule

- (2) The *per-tonne carbon price equivalent* for a designated 6-month period is to be worked out to 2 decimal places (rounding up if the third decimal place is 5 or more) using the formula:

$$\text{Total of adjusted reference prices} + \left[\left(1 - \frac{\text{Total of designated limit percentages}}{\text{Total of designated limit percentages}} \right) \times \text{Average carbon unit auction price} \right]$$

where:

average carbon unit auction price means the average carbon unit auction price for the designated 6-month period.

total of adjusted reference prices means the total of the adjusted reference prices for the designated 6-month period.

total of designated limit percentages means the total of the designated limit percentages for the classes of eligible international emissions units that are subject to designated limits for the financial year in which the designated 6-month period ends.

- (3) Subsection (2) has effect subject to subsection (4).

Per-tonne carbon price equivalent—special rule

- (4) If:

- (a) no instrument is in force under subsection (6) at the end of a particular designated 6-month period; or
- (b) the per-tonne carbon price equivalent worked out under subsection (2) for a particular designated 6-month period is greater than the average carbon unit auction price for the designated 6-month period;

the **per-tonne carbon price equivalent** for the designated 6-month period is equal to the average carbon unit auction price for the designated 6-month period.

Reference prices

- (5) If:

- (a) a particular class of eligible international emissions units is subject to a designated limit for a particular financial year; and
- (b) a designated 6-month period ends in the financial year;

then, within 7 days after the end of the designated 6-month period, the Regulator must, by writing, declare that a specified amount is the **reference price** for the class of units for the designated 6-month period.

- (6) The Minister may, by legislative instrument, determine the method that is to be used by the Regulator in making a declaration under subsection (5).
- (7) In making a determination under subsection (6), the Minister must have regard to:
 - (a) prices paid (whether in or outside Australia) for eligible international emissions units included in each of the relevant classes of eligible international emissions units; and
 - (b) such other matters (if any) as the Minister considers relevant.
- (8) In making a declaration under subsection (5), the Regulator must comply with a determination in force under subsection (6).
- (9) The Regulator must publish a copy of a declaration under subsection (5) on the Regulator's website.
- (10) A declaration made under subsection (5) is not a legislative instrument.

Adjusted reference price

- (11) For the purposes of this section, if there is a reference price for a class of eligible international emissions units for a designated 6-month period, the **adjusted reference price** for the class of eligible international emissions units for the designated 6-month period is worked out using the formula:

Reference price × Designated limit percentage

where:

designated limit percentage means the designated limit percentage for the class of eligible international emissions units for the financial year in which the designated 6-month period ends.

reference price means the reference price for the class of eligible international emissions units for the designated 6-month period.

Modifications of formula etc.

- (12) If:
 - (a) there is a reference price for a class of eligible international emissions units for a designated 6-month period; and

- (b) the reference price is higher than the average carbon unit auction price for the designated 6-month period;
- then:
- (c) the adjusted reference price for the class of eligible international emissions units for the designated 6-month period is to be disregarded for the purposes of the *total of adjusted reference prices* component of the formula in subsection (2); and
 - (d) the designated limit percentage for the class of eligible international emissions units for the financial year in which the designated 6-month period ends is to be disregarded for the purposes of the *total of designated limit percentages* component of the formula in subsection (2).
- (13) If:
- (a) a class of eligible international emissions units (the *principal class*) is subject to a designated limit for a particular financial year; and
 - (b) there is a class of eligible international emissions units (the *secondary class*) that:
 - (i) is included in the principal class; and
 - (ii) is subject to another designated limit for the financial year;
- the designated limit percentage for the secondary class of eligible international emissions units for the financial year is to be disregarded for the purposes of the *total of designated limit percentages* component of the formula in subsection (2).
- (14) If:
- (a) a class of eligible international emissions units (the *principal class*) is subject to a designated limit for a particular financial year; and
 - (b) a designated 6-month period ends in the financial year; and
 - (c) there is a class of eligible international emissions units (the *secondary class*) that:
 - (i) is included in the principal class; and
 - (ii) is subject to another designated limit for the financial year; and
 - (d) the reference price for the secondary class of units for the designated 6-month period is greater than or equal to the
-

reference price for the principal class of units for the designated 6-month period;

the adjusted reference price for the secondary class of units for the designated 6-month period is to be disregarded for the purposes of the *total of adjusted reference prices* component of the formula in subsection (2).

(15) For the purposes of this section, if:

- (a) a class of eligible international emissions units (the *principal class*) is subject to a designated limit for a particular financial year; and
- (b) a designated 6-month period ends in the financial year; and
- (c) there are one or more classes of eligible international emissions units (the *secondary classes*) each of which:
 - (i) is included in the principal class; and
 - (ii) is subject to another designated limit for the financial year; and
 - (iii) has a reference price for the designated 6-month period that is less than the reference price for the principal class of units for the designated 6-month period;

the *adjusted reference price* for the principal class of units for the designated 6-month period is taken to be the amount worked out using the following formula (instead of the amount worked out under subsection (11)):

$$\text{Reference price for principal class} \times \left(\begin{array}{r} \text{Designated} \\ \text{limit percentage} \\ \text{for principal class} \end{array} - \begin{array}{r} \text{Total of designated} \\ \text{limit percentages} \\ \text{for secondary} \\ \text{classes} \end{array} \right)$$

where:

designated limit percentage for principal class means the designated limit percentage for the principal class of units for the financial year.

reference price for principal class means the reference price for the principal class of units for the designated 6-month period.

total of designated limit percentages for secondary classes means the total of the designated limit percentages for the secondary classes of units for the financial year.
