- Step 8. Take the reduction for assets away from the maximum payment rate: the result is called the **assets reduced rate**.
- Step 9. Compare the income reduced rate and the assets reduced rate: the lower of the 2 rates, or the income reduced rate if the rates are equal, is the **provisional payment rate**.

Step 10. Work out the amount per year (if any) payable by way of remote area allowance using Module G below.

Step 11. Add any amount obtained in step 10 to the person's provisional payment rate (see step 9). The result is the person's **rate of veteran payment**.

Note 1: For ordinary/adjusted income see point SCH6-E1.

Note 2: If a person's assets reduced rate is less than the person's income reduced rate, the person may be able to take advantage of provisions dealing with financial hardship (sections 52Y and 52Z).

Note 3: If a person's rate is reduced because of Module E or F, the order in which the reduction is to be made against the components of the maximum payment rate is laid down by clause 4 of Part 1.

Note 4: The rate calculation for a member of a couple is affected by the operation of point SCH6-A2.

Note 5: The rate of veteran payment for a day will be rounded to the nearest cent (see subsection 58A(5)).

Note 6: For the minimum amount of a fortnightly instalment of veteran payment, see subsection 58A(9).

Note 7: An amount of remote area allowance is to be added under step 11 only if the person's rate of veteran payment is greater than nil.

Method statement 8 (veteran payment, blind)

- (9) The rate of veteran payment for a person who is permanently blind is worked out in accordance with method statement 8.

Method statement 8

Step 1. Work out what would be the person's rate of veteran payment if method statement 7 applied to the person: the result is called the **notional income/assets tested rate**.

Note: This is the only situation in which a blind person's veteran payment can be made subject to an income test or assets test (see point SCH6-A3).

- Step 2. Work out the person's *maximum basic rate* using Module B below.
- Step 3. Work out the amount of pension supplement using Module BA below.
- Step 4. Add up the amounts obtained in steps 2 and 3: the result is called the *maximum payment rate*.
- Step 5. Work out the amount per year (if any) payable by way of remote area allowance using Module G below.
- Step 6. Add:
- (a) the maximum payment rate; and
 - (b) any amount obtained under step 5.
- The result is called the *non-income/assets tested rate*.
- Step 7. Compare the notional income/assets tested rate and the non-income/assets tested rate: whichever is the greater is the person's *rate of veteran payment*.
- Note 1: The rate of veteran payment for a day will be rounded to the nearest cent (see subsection 58A(5)).
- Note 2: For the minimum amount of a fortnightly instalment of veteran payment, see subsection 58A(9).
