## **Taxation Determination**

### Fringe benefits tax: what is the benchmark interest rate to be used for the fringe benefits tax (FBT) year commencing on 1 April 2003?

#### Preamble

The number, subject heading, date of effect and paragraphs 1 and 2 of this Taxation Determination are a 'public ruling' for the purposes of Part IVAAA of the **Taxation Administration Act 1953** and are legally binding on the Commissioner. The remainder of the Determination is administratively binding on the Commissioner. Taxation Rulings TR 92/1 and TR 97/16 together explain how a Determination is legally or administratively binding.

1. The benchmark interest rate for the FBT year commencing 1 April 2003 is 6.55 per cent per annum. This rate replaces the rate of 6.05 per cent that has applied for the previous FBT year.

- 2. The rate of 6.55 per cent is used to calculate the taxable value of:
  - a fringe benefit provided by way of a loan; and
  - a car fringe benefit where an employer chooses to value the benefit using the operating cost method.

### Example

3. On 1 April 2003 an employer lends an employee \$50,000 for five years at an interest rate of 5% per annum. Interest is charged and paid 6 monthly and no principal is repaid until the end of the loan. The actual interest payable by the employee for the current year is  $$2,500 (50,000 \times 5\%)$ . The notional interest, with a 6.55 per cent benchmark rate, is \$3,275. The taxable value is \$775 (\$3,275 - \$2,500).

**Note:** *FBT* does not apply to a loan in relation to a shareholder in a private company, or an associate of such a shareholder, that causes (or will cause) the private company to be taken under Division 7A of Part III of the Income Tax Assessment Act 1936 to pay the shareholder or associate a dividend.

### Date of effect

4. This Determination applies to FBT year commencing on 1 April 2003.
